Thread: [Google Ads Keywords Disapproved](#)

DailyVitamine - March 13, 2022, 11:41 am

Hi SEA experts

In the past 9 months I have been advertising my business on Google ads without issues.

Since the last couple months I have been experiencing my ads being disapproved based on keywords. The weird thing is that my competition is still advertising without issue. My ads are being disapproved under the condition "Dishonest behavior"

Is there any way how to bypass this? Since my competition is advertising on full power without any further issues. Imo there should be a way how to bypass the ads being disapproved.

The keyword that is being disapproved = Followers

Any help is appreciated and I am ready to pay for the golden tip or help.

Hey, im not an expert on google ads but my tip would be to delete or suspend that account and make a new one as once google starts to disapprove it gets alot of red flags from them on the account.

another tip would be to appeal their decision to google and see what they say

Thank you for your answer! But don't you think Google will recognize the new account based on personal details such as creditcard or address and flag it automatically too?
