Thread: [Searching for alternative software/bot to auto posting in 900 different websites](#)

travissimons - March 15, 2022, 12:25 am

I'm a blogger and I usually post in several websites articles in order to promote my website.

Nowdays I'm member of 900 community websites, forums websites , bookmark websites, press releases, social network websites, article submission websites, and other similar communities.

I dont have time to login in +900 websites at same time and post individually in all of them each 3 days.

My question is: What is the best solution to post in all of my 900 websites at once using an automated system (Excluding Socialpilot and hootsuite kind of sites)?

There is any software or automated bot method that once I'm log in all websites it can post automatically in all of them in few minutes?

(My point is save long hours log in in all of them and post it individually)

I appreciate any help.

Thanks

I recommend finding a dev that can do this for you. Although support for 900+ websites is kind of a pain in the ass. I bet a good percentage of these websites will use the same platform for their website though, making it easier since the script would only need a few simple changes (for those similar websites).

Horse - March 15, 2022, 5:12 am

ever watched the office? the temp Ryan had similar idea

WebBots - March 15, 2022, 5:39 am

your best bet for this is learning some kind of automation, browser automation studio is pretty easy to learn and you don't need to learn any languages for it

besides from this you're going to end up paying a stupidly high price for a dev to create and maintain something for 900 sites

I can help you make a web service for this. However, every platform is different, some sites with same platform still have different modules to fight robots we need to bypass.

Ok. Where I can learn that kind of browser automation studio? 90% of websites don't need to login because It has already the "permanent logged in option" or "7 day login" like this forum and others.

I just need a bot that enter in each one of those 900 websites, post my article the posting option, add all hashtags, title, picture, and links and click automatically in post button. It's simple. So a basic bot could do that.

I know Socialpilot can do that only in 30 social media websites. But I really need a bot that cover all of mine 900 websites.

Do you know someone that could help me on that?

I'm not into web programming so I need help on that.

WUPHF

I just need a basic bot that could enter in each website that I mentioned and insert (title, body article, hashtags, links, and pictures) and post.

90% of that websites has a permanent log in option, so no need to create a login instructions with captcha solver. Just enter directly in each website and post. Just that.

Can you help me find a bot that could do that?

Barker5lime - March 15, 2022, 7:00 am

If you opt for plan b,and opt for VA ..am your guy for such tedious tasks just PM the info.

Just need any bot that could do the tasks as I mentioned. But I'm not into code so I need someone that create one custom bot or any software that automate all the tasks. I'm just tired of useless Hootsuite and crappy sites like that cover only 5 or 6 big social networks.

Can you do a custom botnet?

No bro, will surely let you know when I come across one, I just know some people make advanced browser automation that may help like someone mentioned above

browser automation studio is software, if you google it you will find it easy enough, they have tutorials on their site and youtube videos on how to get started, no coding is needed at all, it's pretty much just point and click it will record your actions and turn it into a bot

travissimons - March 15, 2022, 8:22 am

There is a specific website?

I need to paid a subscription to use?

Ok thanks that.

I'm just sick of hootsuite, Socialpilot, buffer and crappy websites like that that only gives me useless low quality "Tier 3" traffic from social networks like facebook... ????? for me those sites are useless lol..

Do you think zennoposter could be a good alternative with pre made bots?

007 - March 17, 2022, 1:50 pm

Do not bother with OP. After we agreed on a price, I've been working 6h to show him a demo that perfectly displays I'm capable of making what he needs, he tells me can't pay until 3 weeks from now. Not worth the hassle.
