Ive recieved a Vouch copy. All i can say is Ziron is just An alt belongs Too [Exonia] Aka Laurent Protector Owner.

Ive tested With MB Eset And Avast. Detected.

Heres proof. Its Exonia. All free versions And its weird i didnt get same result as he? Maybe he used a different Crypter or something. Wont Recommend.

[Ziron IS Exonia.] NOTE: He crypted Again Told me to check Malware Bytes Yet still detected
