Wait about 69 seconds between each flip for maximum profits

Whatever it is when you continue playing this game you will end up losing ?

Maharlika - March 16, 2022, 7:30 pm

Bro theres no method pure luck is your only way to win.

jcole - March 16, 2022, 7:31 pm

You can start with a number IE: 10 and if you lose trying to double whatever you lost previous flip.

And more losing than winnings ??

I--I - March 17, 2022, 3:18 pm

Keep doubling your bet when you lose, however you can run out very quickly if you lose too many in a row.

That is one of the worst betting strategies.

Quote:

A martingale is a class of betting strategies that originated from and were popular in 18th-century France. The simplest of these strategies was designed for a game in which the gambler wins the

stake if a coin comes up heads and loses if it comes up tails. The strategy had the gambler double the bet after every loss, so that the first win would recover all previous losses plus win a profit equal to the original stake...

Since a gambler will almost surely eventually flip heads, the martingale betting strategy is certain to make money for the gambler provided they have infinite wealth and there is no limit on money earned in a single bet. However, no gambler has infinite wealth, and the exponential growth of the bets can bankrupt unlucky gamblers who chose to use the martingale, causing a catastrophic loss. Despite the fact that the gambler usually wins a small net reward, thus appearing to have a sound strategy, the gambler's expected value remains zero because the small probability that the gambler will suffer a catastrophic loss exactly balances with the expected gain. In a casino, the expected value is negative, due to the house's edge. Additionally, as the likelihood of a string of consecutive losses is higher than common intuition suggests, martingale strategies can bankrupt a gambler quickly.

...

The martingale strategy fails even with unbounded stopping time, as long as there is a limit on earnings or on the bets (which is also true in practice).[1] It is only with unbounded wealth, bets and time that it could be argued that the martingale becomes a winning strategy.

Any gambling method you use where the house has the advantage you will end up with nothing given enough time.

Maybe you might try some sportsbook games. I would not suggest slots or blackjack for it will be really hard to win on this game as well.

I've checked out sportsbook, might actually just invest it. Gambling straight up might not be a + to

HF. Best way for bytes would be business IMO.

You can try out the crypto game now that the cryptos are getting stable and better maybe you will earn some bytes with the crypto game.
