Are you doing vouch copies for this? I thought Rockstar Games put an end to money drops, and that they were severely limited. I can only drop like 100k at a time before I get transaction errors.
Edit: I also only play and grief on PC though.

This is brought to hackforums.net through a business partnership with a modder, I sell at no higher cost than him and he is widely known on certain gaming forums, vouch copies are disabled on hackforums.net however when I hit 15 posts and can verify my discord I will share screenshots of authentic customer feedback.

Edit:

This is not done via a money drop since that is unable to do on next gen

Pusha8 - March 18, 2022, 7:37 pm

So how would you do this by logging into account ?

All packages are split between deluxos and cash allowing very little ban rate, deluxos are strictly not duplicated and purchased through gta v

To get the cash from deluxos sell 2 every 1 hour and no more than 7 in 30 hours, updating thread rn to better inform of this.

While the method is secret and vague, the quality of this service is not, I will add a screenshot of vouches when I hit 15 posts to OP if it abides by HF policy.

Ok, can you post the screenshots of your authentic customer feedback on this thread?

4. All vouches in threads must be related to a Contract and from a verified "Contracted Customer". One becomes a verified "Contracted Customer" if a contract has a thread ID (tid) in it.

I have messaged you regarding this

I'm not sure if what I was asking is against the rules, but may have to confirm with a mentor or staff.
I was just asking to see screenshots of the service you do for people.

I just realized upon posting this thread template I forgot to remove the competitive forum abbreviations and replace with HF abbreviations, I apologize and I have now done that, if anyone has any questions feel free to let me know,

Cheers.

Did you get my last PM?

Send me a message let's talk

May I ask how you are "Modding" these accounts as it can't be from a PC as you can't transfer accounts from PC to next gen, also mod menus and I speak specifically for Playstation 4, you can only mod offline, to my understanding there is no online modding. I am just curious could you explain what you are doing in order to get these accounts made successfully.

This is brought to HF through partnership with a modder on a competitive modding forum, his methods remain secret even to me however I personally use money provided upfront by him in the form of deluxos and gta cash

75%ish - deluxos

25%ish - gta cash

I'm at work so the info I can provide currently is limited compared to when I'm at home

Ok this makes more sense, you are doing a GTA V glitch, that makes a bit more sense, I don't feel like "MODDING" is the appropriate word in this scenario.

It should be noting that they are not duplicated as it says in OP.

I may also sell call of duty related things in the near future also
