108% ROI monthly reeks of HYIP/Ponzi.

Assuming we compound monthly, starting at 100% for initial investment:

- 1 month = 208%
- 2 months = 433%
- 3 months = 900%
- 6 months = 8,098%
- 1 year = 655,783%
- 2 years = 4,300,510,765%

So this means that your "complex artificial intelligence" shit can theoretically make me a multi-millionaire in only 2 years for an initial investment of \$1.
