Thread: [Online Vape Shops w/o adult signature?](#)

Wage - March 19, 2022, 5:41 pm

Looking for some online vape shops delivering in the US that do not require 21+ signature on delivery. Do not care if ID is needed or not, just need no verification at delivery. Car's been down unfortunately so I cannot hit up the middle eastern gas station owners at the moment. Thanks!

You can't get a ride? What you will pay online will cost you double most likely. Guessing your underage but I suggest don't smoke buddy. I did for many years over 15 actually. It's an expensive and harmful habit

Don't vape pal. People who vape look like Al Jourgensen from Ministry. Smoking is fine though, long as you can control the habit.

I buy from online juice sites and have never had to sign anything upon delivery. Have you even tried ordering?

Damage has been done already, since 15/16, almost 20 now. :/

Well then you don't have much longer to wait, like I said, just try online vape stores. I've never had to sign for anything. At least not in the US

I thought this thread was gonna be about starting a vape brand. Don't vape the sooner you quit the better FR. This is your time right now to stop.

Did you know that the ancient romans called vapes "pussy-sticks"? This was later adapted by Randy in South Park.

Maybe this varies by location, but I haven't seen a single delievery company (USPS, UPS, FedEx) require a signature since ~2020. They just bypass it.

Depending on your location, there is a app called "wish" where you can basically buy chinese junk. But they also sell vapes w/o any ID

The problem with buying from wish or alibaba is the vape juice is trash. The knock-off puff bars are terrible tasting and probably terrible for your health even more so than traditional juices.

not really lol you can still have no issues if you slow down/stopped now. im not telling you have to but just saying that your wrong on that people live for a long ass time after smoking alot in younger years.

i used to buy from a site called juishy. They where good for 100ml juice for the low.

I agree with inviz.

4-5 years is nothing when you've been smoking for 15 years.

The damage may be done but why increase the damage?

I have tried so much to quit and I'm not going to let it manifest beyond 15 years.

Better to draw the line sooner rather than line

I've spent well over \$100,000 on cigarettes in the entire duration.

I've figuratively smoked an entire house worth, for what? An hour of relief before feeling like I need another?

It's not worth it.

So far I am smoking cigarettes with 8/10s less tar.

If you can't cold turkey, just slow your usage
