<https://newsable.asianetnews.com/sports/tennis-indian-wells-rafael-nadal-reveals-breathing-difficulties-leaves-fans-worried-snt-r93rll>

"It's tough for me to breathe. When I try to breathe, it's painful, and it's very uncomfortable," Nadal said in a post-match press conference.

"When I'm breathing, and when I'm moving, it's like a needle all the time inside here. I get dizzy a little bit because it's painful. It's a kind of pain that limits me a lot. It's not only about pain. I don't feel very well because it affects my breathing," the Spaniard explained."

Well seems like the double jab worked wonders for Nadal(one of the fittest people on this planet) Novan Djokovic did not have breathing problems because he didn't get jabbed.

Now it's common fact that these vaccines are causing myocarditis. If you look closely at the left side of his face, it seems to be paralyzed. Other adverse reaction of the "Jab" is Bells Palsy.
