Thread: [Ownership and source code of everything I've sold on here.](#)

Angela White - March 24, 2022, 4:33 pm

Make an offer, I have programs, eBooks, domain names, etc. Full ownership of everything. If you're interested in anything of mine not listed here, then ask privately.

All of these products were selling before my 6-month hiatus from HF. I no longer have interest in selling these products in the marketplace. You will receive all source code (if you buy the software) and I will delete everything from my PC after you purchase. All domain names are registered with NameCheap. All software was developed in C#. I will provide a reasonable level of support.

(want to buy all 3 remaining projects? \$120 bundle, PM me)

Software:

[SOLD] <https://hackforums.net/showthread.php?tid=6139308> - \$100 or best offer (fully working and updated)

<https://hackforums.net/showthread.php?tid=6147594> - \$75 (needs to be updated to latest onlyfans version, but the entire base code is there and functional, not that hard to do)

<https://hackforums.net/showthread.php?tid=6142026> - \$40

<https://hackforums.net/showthread.php?tid=6163040> - \$15 (niche product)

Licenses:

Font Awesome 5 Pro (you will be added as a user to my legitimate license) - \$20

Font Awesome 6 Pro (you will be added as a user to my legitimate license) - \$40

Domain Names:

i just remembered source needs updating but it should take less than 5 - 10 mins to update, i'll throw it to ya for \$25 if you want and I'll remove it from the thread.

code is surprisingly simple and every time it's patched you just need to swap out a key in the program.

It's probably just a call to:

Quote:<https://rdap.verisign.com/com/v1/domain/{x.com}>

<https://lookup.icann.org/api/whois?q={domain.com}>

<https://rdap.markmonitor.com/rdap/domain/{domain.com}>

<https://rdap.registrarsafe.com/domain/{x.com}>

<https://domainsrdap.googleapis.com/v1/domain/{x.com}>

Returns a 404 if the site isn't registered or known. Very simple.

A lot of info overload. Somehow in my head I thought it was something else. like OG name grabber or something

big brain me ?

Look for any old RDAP API to call. RDAP is the protocol you need. Doesn't cost you a penny, you're welcome!

It's not using that actually but that's another thing you could do. If he wants to do that he's more than welcome to.

Lots of different tricks, lots of different methods. As long as you're not web-scraping, your price is as valid as any. Hats of to you for your honesty and good luck with sales, some of these projects look interesting.

Slow, less efficient, needs to be updated when the site changes, sometimes illegal, whereas API's generally remain stable and you get notified if changes occur.

Some API's allow you to register on the spot, meaning you can build a tool that checks the availability using an RDAP API, and you can instantly register it and it will withdraw the required amount from your balance. Way less work to use API's, way cleaner, way more legal, way more efficient. This is how the big boys operate if you don't account for all the companies that have [their own registrar services](#).

Here you go, this should be everything you need to get you started:

Depends. Here are some of the notable court cases over the years:

If I had oodles of money you bet your ass I would buy milf.wiki and pay very large sums of money to advertise and make it a thing.

Sadly I have 3 pennies.

That's what I bought it for, I'll sell it for the right price but I do think it's a goldmine if advertised properly. Just make it a search engine of all milf pornstars that takes you to a list of where you can find all of their most HD videos around the web and gives you information about their life and where they grew up and shit

Nah you're thinking too limited, fuck pornstars, I want to see some guy post about Eric's banging Mom. Literally just people uploading their friends mom's or teachers to the site is the gold I'm after.

milf.lol sounds quite interesting

Angela White - March 28, 2022, 12:45 am

Just furtherly lowered the price on everything. Come snag it.

Stanley - March 29, 2022, 11:03 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Angela White - March 31, 2022, 12:10 pm

Will give the last 3 projects away for \$120 for all 3. Take em off my hands so I can close all my threads pls.

Angela White - April 2, 2022, 11:18 am

Just updated the thread, come grab these projects so I can log out.
