Thank you @Richard Hendricks

I am not providing any vouch copies for this product as I have listed a public profile that is actively running the script as we speak.

I'll ask the age old question not a single e-book/method seller can answer:

Why do you sell this as opposed to making bank yourself if it's guaranteed?

The way I see it you could run an infinite amount of tabs on different accounts, even different devices.

This would yield you much more than a measly 150\$.

Please, don't give me none of that crap about "sharing is caring" or "giving to the community", this is not a reason. Especially not for a gambling script.

Thanks in advance.

Because it has no impact on anyone's returns, as it's not something that can get saturated.

The results are there for the checking, and you ultimately can determine if it's a good fit for you or not.

And yes it is gambling, and yes it has risks, but its also down to how you manage your risk - from my experience anything else out there will not offer as low of a drawdown as this.

A lebouchere system for example (which was quite popular a while back) will give you a drawdown of 4+ coins on a small base bet, so I am sharing because if you are going to "gamble" you at least give yourself the best chance of success with this script, unlike like other scripts.

i purchased this product on April 12th. I still haven't got the script to work. Still waiting for Op to respond. I will update with results.

Hi David,

Apologies for the delay.

I sent out the product and your license accordingly, but I've been on holiday hence the delay in response

Sending you a DM now to get things up and running ?

Hello STREAMMATE,

I am not offering any trials of the product as it's an exact replica of what "TOSHINEZ" is doing.

Before I buy this can I see you use it? just so I know it works... You can just send me a vid of you using it or screenshare on discord typa thing, because there is a comment here saying that it didnt work for him so I wanna see it work before I buy

Can you give me your discord? I want to message you a fault in your script but I don't want to post it here incase it loses you purchases

The issue was with the license (not the script), and has been resolved with the user.

Happy to discuss it further, if you're still interested send me a DM ?

Hey I would like to buy this script, is it still available and running well? I checked the account on bustabit and it seems that it hasn't played in 6 months.
