Thread: [22x Bitspyder invites](#)

funsttimebest - March 26, 2022, 12:07 pm

Have 22x bitspyder.net invites available, free giveaway.

It's an e-learning private tracker. Has a ton of content, including TTC courses I did not see on public trackers.

Fair warning, it is a difficult tracker to build up your ratio on if you don't upload your own content.

A ratio proof showing 3+ months or more seeded required for an invite.

DM me ratio proof for an invite.

The tracker does and dongs:

- does not allow public proxy servers
- They will automatically delete your account if you remain inactive for 50 days, get around this by simply always seeding one torrent.
- users must successfully Download or Upload at least one torrent within the first week of signup to be considered as a valid account, else the account will be permanently Disabled
- don't try to get or use multiple accounts

Hey friends, happy to start sending invites, but please message me a screenshot showing at least one of your active torrents seeding for 3+ months.

For those unfamiliar with ratio proofs, here is how to do a ratio proof

- Must be a full desktop screenshot
- show active torrents and their ratios and seedtime

CENSOR (blackout) your:

- Username
- Avatar
- Class/rank

- Bonus/credit points
- decimals of your ratio, eg if 5.89TB UP 2.34TB Down, it should be censored to show 5.xxTB Up 2.xxTB Down
- seconds of seedtime
- and anything else that could specifically identify you

Example screenshot.

I use a seedbox located in a torrent-friendly country for many years, 24/7 almost no downtime. Highly recommend a seedbox in general.
