????

**UrBruhta** - May 31, 2022, 7:39 pm

I'm really excited to see this in action and for those of you that are having issues with Rate limits just use a proxy <3

Edit

If anyone is experiencing issues (It is opening/closing) be sure that you run the program in the cmd prompt. Also be sure that you have firefox\webdriver.py", in the location as the .exe does not always properly generate it. You can google and grab this and it will work )

Also very nice program, you can increase efficiency if you were to allow proxies to be added and let users set threads for fast results. Looks like it was done using python/selenium. Nice work!
