**odinsmokesbowls** - March 28, 2022, 9:35 pm

Hello HF,

I have decided i will be Providing a full service for all of your RAT, Botnet, and all Blackhat related needs.

I will help you with Setting up and choosing the Best RAT, HTTP Botnet, Cryptors, Exploits, Miners, VPS, VPNs all Based on your necessity's.

I will teach you about OPSEC, How you should use and test your tools, I will try to help you fix any problems with your RAT, Botnet, Cryptor, That you may be having.

I will Test and install your Rat, Botnet on my own VM to insure it works 100%, I will also attempt to port forward your router if you insist on not using a VPS, VPN but this will differ based on which router you have because i will not have the knowledge to port forward every router on this planet but i will give it my best try, But this can be fixed if you use a VPN with port forwarding or a VPS.

I will also be providing a full 1 on 1 Mentorship Where i will teach you 4 different spreading methods and will answer and help you with any questions you will have with anything related to BlackHat activity's

This service is very Noobie friendly and i will answer all of your questions with respect and will not shame you, For advanced users i will still try to answer any questions you have aswell.

For prices and support please contact me via convo or private message, You can also use my contacts list below

Depends solely on the payload within the variant of malware. Manually decompiling .Py payloads within Metasploit works great. Swap out words that use "Payload", "Stub", "TCP" etc. These are all flagged by most common AV's once they attempt to read. Of course Metasploit is not used for botnets but rather much more effective for spearphishing. You can pay for private crypts, worth to note it may help you to use a Loader.

Can also try to use several different protection mechanisms of different softwares. .Net Reactors, Obfuscation services as well. Creating your own tools also helps greatly there for you're not sharing same variant with a 1000 other people.

Odin is the best person I met on the forums, highly professional and available to clarify any question, he helped me in configuring amadey and pureminer, as well as pointing out the best hosting and crypter services. His service is definitely worth more than he asks for. Thanks friend for pointing me on the right path.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

Closing this thread because i am no longer providing this service.

Will continue to mentor the customers who have already bought but not taking any new customers.

Thanks to all who have bought in the past.

Also, To the admin who moved my thread to premium sellers section but left Xvulnerables in the  
RAT section. Fuck you for blackballing me
