Thread: [Green Metaverse Token \(GMT\)](#)

Take A Risk - March 29, 2022, 2:21 pm

GMT is the governance token of STEPN with a limited supply of 6 billion tokens.

Players buy GMTs to burn in the STEPN app in order to access features provided by STEPN, such as mint high-quality Sneakers, upgrade high-quality Gems and participate governance voting.

STEPN is a Web3 lifestyle app with fun social elements and gamification design. Users equipped with NFT Sneakers – walk, jog or run outdoors to earn GST, which can be used to level up and mint new Sneakers.

Player can choose to lease or sell their NFT Sneakers on the in-app Marketplace; users' GST earnings are stored in the in-app Wallet,

What do you guys think about this project would you drop a bag in it ?

shit coin, scam coin, pump and dump. read the charts and see the inflated pump. they are slowly taking profits instead of all right dumping.

10 million liquidity, 10 billion market.

My friend has made \$6K in 2 days on buying sneakers walking in them and selling.

SUI-3183372 - April 1, 2022, 11:14 am

I like the concept behind STEPN. I don't think this is a billion+ dollar industry.

Take A Risk - April 1, 2022, 12:45 pm

I like the concept too the coin made x20 just this month it can crash hard so its safe to say its a gambling play right now

Driz - April 2, 2022, 9:15 am

They're using Khabib to promote it lmao
