Thread: [Question About Chaturbate + Fake Webcam Software](#)

travissimons - March 29, 2022, 10:34 pm

Anyone tried to register as a broadcaster in Chaturbate or Cam4 and earn money using a Fake Webcam software?

Look like they don't ask for any ID CARD, you just stream your webcam and get paid (tokens) by customers, right?

There is any way to get make money from it and don't get banned?

They need to know that a model are legal age to do it. How you think they can check it without verification ? There is age verification with ID

I supposed that wasn't necessary. So it's not possible create a fake cam with a long recording in it. But do you think there is any way which could be possible bypass that? Like with a fake ID/fake documents or maybe create some documents on black market?

People will eventually see you're looping footage and everyone will leave.

Better to find a real girl who'll partner up with you - and ofc split profits.
