Thread: [\[php/mysql\] Upload multi files](#)

blackcoder00 - April 5, 2022, 6:14 am

good afternon hackforums family ,
i got a problem when i want to upload multi files into mysql server i dont know where is my problem
here i display many message to verify where is my problem and i didn't find any clue
my idea is to make a directory and put into many files (php/sql/html ...)

i need help guys please

php code to upload files

PHP Code

```
<?php
//database configuration file
session_start();
$servername = "localhost";
$username = "root";
$password = "";
$dbname = "github";
$description = $_POST["description"];
$dateTime=date('Y-m-d H:i:s');
$dir = $_POST["directoryName"];
$user = $_SESSION["username"];
$conn = new mysqli($servername, $username, $password, $dbname);
// Check connection
if ($conn->connect_error) {
    die("Connection failed: " . $conn->connect_error);
}
echo "hello1";

if(isset($_POST['submit'])){
    // File upload configuration
    $targetDir = "project1/";
    $allowTypes = array('php','html','css','gif');

    $statusMsg = $errorMsg = $insertValuesSQL = $errorUpload = $errorUploadType = "";
    $fileNames = array_filter($_FILES['files']['name']);
    echo "hello2";
    if(!empty($fileNames)){
        echo "hello3";
        foreach($_FILES['files']['name'] as $key=>$val){
            // File upload path
            $fileName = basename($_FILES['files']['name'][$key]);
            $targetFilePath = $targetDir . $fileName;
            echo "hello4";
            // Check whether file type is valid
            $fileType = pathinfo($targetFilePath, PATHINFO_EXTENSION);
            if(in_array($fileType, $allowTypes)){
                // Upload file to server
                echo "hello5";
```

```
<label>Project name</label>
<input type="text" name="projectName"><br>
<label>Project description</label>
<textarea name="description"></textarea><br>

<span>PUSH PROJECT</span>
<input type="file" name="files[]" multiple >
</div>
<input type="submit" name="submit" value="UPLOAD">
[b]<!--[/b]<input type="submit" class="uploadBtn button5" name="uploadBtn" value="Push" />-->
</form>
```
