(May 27, 2022 12:04 AM)Johnnycash Wrote: [\[CITE\]](#) my unbiased review of Deep Web's service

[+] Quality I have bought from deepweb twice from now, this time being a load of 500 EU. And I can say that the quality is pretty good. My file is a GPU only install file - and from my 500 loads I received roughly 40 ish connections from it, a mixture of mid tier to high tier GPU's. Expect to see graphic cards ranging from 960's to 3080's, most of them being 1660's, 1060's, or 2060's. Nothing special in terms of quality, but also nothing bad in terms of quality. For quality, I give it a 8/10

[+] Pricing compared to other sellers deepweb is offering some pretty competitive prices. For the quality as mentioned before, mixed with the price, I'm going to give it a 9/10

[+] The seller the seller has been more then friendly with me and helped me with multiple questions, and occasionally gives you more then you paid, but don't use this as a way to get bots from the seller. All in all, he's a kind gentlemen. I'm giving the seller 9/10

Overall, the product is reliable, well priced and the seller is nice to talk too. Whenever issues would come up, we would work through it to try and get me the best possible outcome. I'm giving this product a 8.5/10

Best Regards,
~Roma

I won't even send from my botnet, private loads will be organic directly from the traffic site, traffic source come from google ads and they enter and download your file directly. Private might take from 1 to 3 hours to finish (1,000 bots)

Shared will take 1 to 3mins to arrive (1,000 bots)

my unbiased review of Deep Web's service

[+] Quality I have bought from deepweb twice from now, this time being a load of 500 EU. And I can say that the quality is pretty good. My file is a GPU only install file - and from my 500 loads I received roughly 40 ish connections from it, a mixture of mid tier to high tier GPU's. Expect to see graphic cards ranging from 960's to 3080's, most of them being 1660's, 1060's, or 2060's. Nothing special in terms of quality, but also nothing bad in terms of quality. For quality, I give it a 8/10

[+] Pricing compared to other sellers deepweb Is offering some pretty competitive prices. For the quality as mentioned before, mixed with the price, I'm going to give it a 9/10

[+] The seller the seller has been more then friendly with me and helped me with multiple questions, and occasionally gives you more then you paid, but don't use this as a way to get bots from the seller. All in all, he's a kind gentlemen. I'm giving the seller 9/10

Overall, the product is reliable, well priced and the seller is nice to talk too. Whenever issues would come up, we would work through it to try and get me the best possible outcome. I'm giving this product a 8.5/10

Best Regards,
~Roma

Do you really infect your malwares via Google Ads? Just ads? Do you use a JAVASCRIPT malware?????

Or. Is the ads, your website's Ads?

Please answer..

I have a landing page, many of them.

For example one of them is a csgo cheat, i google ads the page and then whoever search csgo cheat on google my page will popup and they'll download my loader.

For geo target i can also do google ads for a a targeted country too.

It is very hard, you need to have a lot of good keywords and FUD site so it can get approved for google ads.

I can target any audience you want, for example crypto people by using auto trading bot website or others.

If you have any more question feel free to ask me :)

You advertise just so that they will come to your gamehack website and they run the software that is binded and FUD with your loader...Hmm is it right?

so this is where these bots come from?

Which loader do you use?

Yes, i have a lot of different kind of bot.

Gpu bots

Crypto bots

Paypal-amazon bots

Netflix and social media bots

Much more.

I use a custom made loader now, i used to use smoke but i stopped since its runtime got detected even after crypt. :)

REVIEW FOR SERVICE!

My review for this seller service is very bad, I would say 3/10. First time I bought test package for 100 bots - and in some minutes received 84 bots. (non crypted exe) After this package I bought one more for \$40 and waited 4 days him to send bots. He said me he sent and I received 0 bots. Next day he said he asleep and started now. From 300 bots I received only 72 (with crypted exe) I asked where is the problem if I received in first time purchase from 100 bots ->84 and it was non crypted exe just with original settings and it wasnt FUD exe but on crypted FUD exe I received only 72 not 300! He said I got some restrictions on the crypt. Then he asked me again non crypted exe with original settings which I sent him first time when received 82 bots from 100, then he said next day he started bots on non crypted exe and I still got nothing when in same time I got on same exe 84 bots before from him and its again not working how he said.

I would not recommend anyone his service, long answer times and service not as promised. Just wasted \$70 and got 150 bots in total :) and seller not answering or trying to fix the problem!

I would like to purchase your services. I am interested in starting out with the 1000 mixed package and then will buy more if the results are good. first of all, you never bought from me.

second, i have 5 threads in 5 different forums selling bots and other products since 2018.

i never mentioned that my bots have GPUs, my bots are good for stealers or rats only as they're exchange traffic. you could buy 10,000 of my bots and get only 10 GPUs.

if you want to order GPU bots, then I recommend you buying from [mention=4873170] or [POLLUX](#) as they're the only real GPU sellers on market right now.

thank you.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
