So do you manage account ? or you teach me a trading method ? or a bot with low DD ?
I can vouch.

Luffy - April 7, 2022, 5:05 pm

I would like to try out your services hmu with your contact info

iReFuSe2LoSe - April 7, 2022, 7:47 pm

If you give me a good deal to be first buyer ill start wtih you.

Will I need to invest more?

I can vouch.Up to you, check the packages. The ebook which you will learn the stuff yourself is 99 and the service with guranteed pass is 497. Both are very high quality and you can pass challenges with either.

Yes, check sites like my forex funds, funded trading plus, or just type in prop firms on Google.

All scale to at least one million plus! Expect to reach that level within a year!

By the way, those accounts are live of my own client accounts from Algo empire using one of the bots I will use for this service.

vatrenilav - April 12, 2022, 11:59 am

I have somme questions:

You said 1000\$ dollars income per month, but What is the starting capital? You know it is not the same if i earn 1000\$ with 100\$ and 10 000\$ initial capital.

Secondly, can we somehow use robots for MFF, and what brokers do you use?

Depending on which account you get. An accelerated account starts at 2k and scales very quickly to 10k, 100k+ in a few months. Benefits are weekly payouts and you can make your investment back within 2 weeks. Downside is 50/50 profit split.

A 10k Eval Account takes a little while to pass, around 2 - 4 weeks, but starts you off with a higher amount with a higher profit split 80/20. Downside is only monthly payments are available.

lulzcat - April 13, 2022, 2:56 pm

EDIT: It's important that I address this... There was a misunderstanding about what was going on with my prop account and the EA. Originally I thought I was getting an established strategy that was ready to go; which has already been implemented I believe for other customers and Casual is using himself.

I think the issue was that we had spoken some time ago about testing different systems and I was offered a guaranteed replacement if my account blew up I had forgotten about this which is what has happened here, safe to say that the settings weren't any good but at least improvements can be made based on these results.

Apologies for the confusion this has undoubtedly caused.

Ever Flow - April 13, 2022, 3:23 pm

Waiting for review hopefully it's legit

CasualInvesting - April 13, 2022, 3:24 pm

Responding to the edit:

The service has a GUARANTEED PASS. I will get any member another prop account if it fails. Which is why it is so valuable. Sadly, there is no 100% PASS RATE EA I have found so far. Even the best of them which cost over \$800 still hit 70% etc. So things are bound to not always go right the first time.

The EA I am using has 3 strategies implemented in one, just so happens one of the strategies generated too much drawdown for the fresh account to handle at the time with the lot sizes it used. basically speaking the bot itself is still reliable, just that today was the worst day to start a prop challenge.

No One Loses. One more prop challenge is not a big deal when it comes to the amount we make per month.

Fresco - April 13, 2022, 3:27 pm

(Apr 13, 2022 02:56 PM)Bunta Wrote: [\[CITE\]](#) Not sure what EA's everyone else is using but I lost my prop account in less than a day running one of them.

It made a ridiculous amount of trades and I don't think it has any type of Risk Management developed into it. Just before it closed me out, I had 15 or so open positions which is so much more exposure than if I was manually trading (2-3 Positions concurrent and total MAX DAILY) This thing did a total of 45 trades in less than a day with varying lot sizes some as much as 0.14

check the updated post. The main reason for the confusion is that they misunderstood the service. I never GURANTEED a first try pass, i GURANTEED that you will pass. All this means is that another prop account is coming up.

Just so happened that today wasn't good for trying to do prop challenges on your first day, but stay tuned for more updates!

But when I get the account, and any day I have a high drawdown, I will lose it , right ?

So even If I passed, I need something with low drawdown for the long term

nah the drawdown did recover. The reason it gave problems in Bruta's case is that I used a higher base lot size which I was aware could cause issues during times like that for a fresh acc. It was a gamble to push for a faster pass to secure early vouches. It didn't work out how I wanted it to, but the guarantee allows for me to take some risks without me or you feeling bad if I fail the challenge!

Of course long term drawdown on a live account will be properly managed. I have 3 bots which can pass the challenge, just so happens that the one which can pass it the fastest had a bad day.

Okay I will ask here only because I am really interested in this service, I just have 2 issues: (all about MyForexFunds)

The first one is accelerated account, which can grow from 2000\$ to 324000\$, the only problem is, that overall downturn is 5%. With this robots, it could happen anytime If I understand you? What is the solution then?

Second is, that robots and copy paste strategy is not allowed in MFF, so how do you pass that rule?

I will appreciate if you can answer me, and sorry for lots of questions, If you want you can pm your discord so we candiscuss further.

Thank you in advance :)

Well guys , I think we will meber get the answer on our questions. Guy simply open 4 threads, I messaged him, he ignored quetions, so i ask him here publicly, and again no answer. The problem is , he advice us to use MyForexFunds, but there are 2 problems:

1) Robots are not allowed. Even if you use VPS, okay, they will not see what do you do from your address , but they will see something dtrange and that xou copy signals

2) robots lost tol much, the red line is 5% and robots judt lost more than 10

Before there was option with 99\$ pdf which I bought for 50\$.

Pros:

Guy is very helpful

Gave cracked tools and small review about parameter

Cons:

These tools are easy to find on the net

Not to much in deepth with parameters

For these 50\$ I am not disappointed, but also not very happy. Will see what will come in future updates to this pdf.

Which ones are you having trouble with? I got setup with a paper trading account through a broker using the same leverage and capital as the basic prop challenge account and working on doing some backtesting with one of the bots atm.

1) Robots are allowed on certain prop challenges, for example fundedtradingplus. You have to make sure you use the right challenge prop firm.

2) It only seemed that way from the myfxbooks, but only two accounts, which were the same two that started that day, hit the drawdown. Those accounts would have still been in the game but i made a mistake with the lot size management and equity protection settings. So those members will get a new account soon. The other accounts I'm running for members are fine.

Thanks for the review,

For the cons;

1. The most recent robots aren't easy to find on the net. I now have a dedicated programmer working with me to crack my favorite EAs, so i'm very excited to push this further. You'll see the

updates in the discord group.

2. That's a matter of suggestion. I didn't want to bog down the eBook with too much info on settings tweaking, but the 'nerds' who are interested in that have already reached out and asked for my opinions/started to test things on their own. I'll keep your suggestion in mind though. The discord group has a section for Cracked EAs which will contain my custom ones, so I can include parameter discussions in there.

The best part of this service? It comes with lifetime updates, and i doubt there is anyone else on this forum working as hard to improve their services and provide updates as I do.

Another thing to note is that a FREE 5 day trial is available for anyone interested.

Sadly they can't be connected to a public myfxbook. But i've put up a few more demo accounts showing the different algos. most are fresh accs so you'll have to wait for the live results. More will be added throughout today.

PS: The Algo that 'failed' is actually doing fine on a regular account. Check Algo #1!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
