Accepted Means Of Payment:

Crypto

Bytes

Paypal

We accept the majority of cryptos, all the big ones plus many altcoins.

Paying with Bytes? Current market value applies, atm 1000 Bytes = \$2.

If you want to pay with paypal you're going to have to buy a giftcard of equal or greater value to the product price.

All sales will be done via contracts here on HF.

Only contact me via PM / Convos or via our Discord that is connected to our HF profile. (Can only be seen if you've verified & connected your own discord to your HF profile)

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

Hi there!

No they're not real usernames, just wrote them as examples.

However our first generation of R2 actually did get quite a few shadowbanned but it has since been resolved with newer versions of the software.

(Not going to mention all things we did as to protect our product) but mainly we've added randomized usernames & passwords as well as higher level email domains (ex @yahoo.com, instead of a .ga domain) and lastly we added a randomized avatar function.  
Oh and useragent switcher!

Thanks for pointing this out btw, probably should've used real logs for the example.
