1. Use legit email addresses for your accounts.
2. Use SMS verification sites
3. Invest some money monthly for accounts like email/dating site if got banned.
4. Have different Chrome profiles for each account, make new when needed.
5. Try to get a Dedicated IP, if you have enough money.
6. Be good at SE'ing. Make ready for every moment.
7. Much time is needed if you do it manually.

Using an unsaturated model and a realistic snap w around 170k score, I made around \$2600 in half a month (only accepted cashapp, venmo, and apple pay; also made around \$400 in various gift cards).

Warning though, snap is very easy to get banned on so recommend taking measures to lessen the chances of a ban.
