Thread: [MAKE YOUR OWN BOTNET OR SHOP | NEVER SEEN BEFORE | VOUCHED BY BUYERS/FEW COPIES LEFT](#)

Perplex - April 18, 2022, 12:39 pm

As some in this game may have noticed i been selling bots for a bit here on hf, with a pretty good succes. I have alot of happy customers and alot of returning aswell. This is because i know some things that the other sellers here on hackforums does not. They may think they do, but they most likely do not.

Albeit, my activity and post count has been steadily dropping for a while, due to me working on other projects that i find more interesting and lucrative. This means my presence on hf is dropping and will likely continue to do so.

Its a shame to leave such a goldmine in the dust tho, just because i find a better one.

Because of that is have decided to offer my knowledge for sale to a few people. Both to clean a bit up in the very messy botshop business, but also to cash in a bit on what i know in a quick and time-effecient manner.

Pulling this off will not be super cheap if you start from scratch. It can easily cost you a bunch to get started, and should not be purchased if you run with a tight budget.

If you start from zero you will need 1-2k to get started beyond my price, atleast.

If you already are in the malware game, and have solid tools at your disposal, it will not be particularly expensive to do.

From 50-500 to get going.

The potential gains are very big tho.

This method does not contain alot of pictures and "how to setup" all kinds of shit - Its not meant for newbies that never worked with this before, unless you are down for a very steep learning curve.

This is not some exploits or "Spreading method". This is knowledge on how to get into the big game, how to buy traffic from untapped sources at very favorable prices. This is as close as we get to exploit kits in 2022. Without any 0days

This is how you see people gain many many K bots a day.

You most certainly do not have to use this to run a botshop, you can also use it to grow your own private network. This part is up to you

Each install will come at a cost, so unless you already have solid ways to generate profits, a botshop is the easiest way to get started capitalizing on it.

its not some shit like go to superstars botshop, install lab, installshop, or any other tg botshop or russian botshop. This is is how they supply themselves. This is not even well known by there communities.

You will learn what it takes, how to make it happen, and what you can do with it easily

After you have purchased this you will learn

1. Where to get geo targeted high quality bots, on demand, around 70-90% cheaper than you seen before.
2. How to transform this into an automated botshop if you wish to do so. That will generate you money forever and without requiring much work from your site
3. How to advertise said automated botshop and gain customers cause you got good shit

This means there will not be any "moneytizing" method with this, beyond reselling it for massive profits, as such methods you must develop for yourself.

Near unlimited cheap geo targeted traffic can be used for sooo many things.

The setup will not be instant, it takes a bit of time and work to pull this off with success. Its not hard, but there are multiple steps in the process that must be checked off for it to work perfectly

This is not something i have taught anyone before, neither to people that paid me for mentoring.

You will receive full support to make it work, but i expect you to already know basics, such as how to make a website, how to host it, how to run malware and so on, how to do or order other to do simple shit. You will not need any complex coding skills, or graphic skills, or video skills or anything like that to pull this off.

Anyone with the interest and the funds, pm me for a chat if you got questions.

i will limit this to 5 sales at 1000\$ each

1 "vouch" copy sold at 750\$

Vouches from sales

Spoiler ([Click to View](#))

Code OGGKushMed:

I come to make my return on the method of Perplex

First of all I have to say that he is a very nice person and he explains things quite simply if you need it.

He is often online and he answers very quickly which is also an advantage to deal with him.

The method itself, it goes to the essential and each important step is detailed extremely well so that everything is as simple to understand as possible.

The figures announced to start with are also quite accurate and everything that touches the tools you will need can confirm it.

The method is quite quick to set up if you already have the necessary tools and there is no need for great web or it skills to do it easily.

I insist on the fact that the tools are extremely important and it's better to lose a few days like me if you think you need to get some of them back

All the information given in this method will make you get as OP says geo-targeted and quality installations.

I knew and I see now the huge potential of this method and the gains can be as consequent if the work is well done and maintained

And if you have any question, Perplex will help you and accompany you if you need it

I will add some more info in a few days.

If you are looking to get into this game for any reason, I can only recommend this guy and his method

Thanks again Perplex ??

(May 18, 2022 10:06 AM)IGotAmnesia Wrote: [\[CITE\]](#) I can not recommend this enough. Sellers is truly amazing in helping me out, he's online a lot and get's back to my (many) questions and requests within the hour. So far this has been the best investment I have made in a long time.

I bought both mentorships from sellers and he has just been incredible in helping me setting everything up. Like he mentioned, I am completely new to botnets and all that it surrounds, and I wanted to set everything up properly. I'm currently still in the process of setting everything up, but that is 90% on me and 10% on the sellers of some tools I needed, and 0% OP's fault. I personally think you should really set this up properly, which simply takes time. But if you've got your opsec down already you could pretty much set this up within a day or two.

Seller also has a vast knowledge of the space and I really feel I'm going from zero to hundred within days of him helping me out.

In general it is also just super fun and interesting to do the work.

It's also crazy how many angles you can take on this to monetize it. There are just so many and I'm learning every day.

Really appreciate your help OP!

1/5 available

Middle-man accepted to hold funds

If you do not complete the requirements of the method and test it out within a few days, i want my payout.

I know it works, as i do and will continue to do it myself.

I am only selling this because there is room for it, and because i have other things to focus on that makes more money, still i find it a shame to leave my knowledge unused. Also its a shame to leave hackforum to resellers from 2-3 different telegram shops, without understanding where these guys get there installs from.

I also may aswell cash in a bit on my knowledge, and someone else may aswell profit from it. Thats what makes the world go around.

I had a fun time doing this, and will continue to do so to certain extend, but my main focus have switched to other areas.

This can well make you a living, in almost any country on earth, if executed right, both on and off hackforums, with or without turning it into a botshop.

They moneytizing potential is limitless, most people here are just very short sighted.

If i dont know you i might request proof of funds or question you out before answering any questions. Again, this is not for new people with pureminer and async

[contract=tid]Start Contract[/contract]

Perplex - April 20, 2022, 4:00 am

Stop buying and trying old shitty spreading method.

Automate the full process and grow a network like you only seen in pictures with my setup.

Easy, fast and damn effective.

Perplex - April 21, 2022, 5:13 pm

Want to start rolling in installs like you havent seen before in years?

Sure, it will cost you a bit, but its well worth it.

Alot of money to be made :)

Perplex - April 21, 2022, 9:15 pm

(Apr 21, 2022 06:34 PM)shatter Wrote: [\[CITE\]](#) I've never operated a botnet before but completely technically proficient at understanding the inherent design of botnets. I'm interested in some of the educational aspects of this service, but \$750 is a lot of money to pay for no monetization.

Always down to talk shop with you though.

Most people don't care about how or why, they just want things to work in their narrow understanding of how a product or a process works. A good example of that are the threads I see requesting FUD crypts, permanently, without truly understanding how crypts work and that permanent solutions are impossible to find. Dreamers.

I've seen pretty amazing work with what people have done on here even with modifying async. Async is open source, it doesn't have to be limited to what's open sourced.

By no means is this "no moneytization". If you cant work out what to do with a massive stream of decent quality geo targeted bots for low prices, i cant help you anyway :)

If you think 750 is alot to pay for this, it probably is not for you anyway.

Most people here are not potential buyers of mine, so i literally couldnt care less about what they can and cannot understand, i wouldnt even lower myself to try sell it to 1 bit brains.

This is for people that are in the game, and know how easy it to make money on these. Either by selling them, or by using them.

The rest of the crowd can go use botshops. This is how you make a botshop instead :) Not something you see often.

On demand tap for geo targeted bots, that does not come from another malwareloader or shop, at lower price then even the most sleezy botshop? What more you need to make \$\$\$

I cant say i ever seen the slightest piece of amazing work done with modified async.
This is not for plebs with async. Modified or not.

How the fuck you plan to hold 10-20-50k+ bots with a c# software? you can modify it so much it have not 1 line of the same code, and it will still not do the trick for you to make anything good out of this.

Perplex - April 21, 2022, 9:46 pm

(Apr 21, 2022 09:33 PM)shatter Wrote: [\[CITE\]](#) You misunderstood what I said. No monetization because no utilizable means for me. I don't run botnets. I was simply curious about the methodology from a purely informational and theoretical standpoint.

You are correct, i misunderstood you :) Regardless, i took the chance to advertise a bit further. ?

Thank you for the interest. Feel free to shoot me a pm if interested, for whatever reason :))

7 - April 21, 2022, 9:47 pm

Whats this like modern EK kits or just mass messy spreading with generic crypts.

I would like to here how your hold 10k bots and what your using to crypt especially when your malware is between 50-500 \$

GLWS anyway

Perplex - April 21, 2022, 9:56 pm

(Apr 21, 2022 09:47 PM)NulldB Wrote: [\[CITE\]](#) Whats this like modern EK kits or just mass messy spreading with generic crypts.

I would like to here how your hold 10k bots and what your using to crypt especially when your malware is between 50-500 \$

GLWS anyway

Its not a EK, clearly :)

Its the 2022 "almost - but not entirely" version of equally broad range reach.

Its not "messy" spreading, Its bang for your buck, no more no less.

Geo targeted traffic that will run your file on demand. But not from another malware loader.

I do not understand the last question.

You want me to tell you how to crypt? What malware costs between 50-500\$? Where are you getting these numbers from?

An adequate runtime bypassing crypt for a light php panel like smoke or amadey will be somewhat sufficiant. Process hollow wont do the trick here, like it does when buying bots through another loaders memory injection..

ideally you step it up a notch ofc.

I say again, this is not for new people.

7 - April 21, 2022, 10:12 pm

This is where I got 50-500 from --

If you already are in the malware game, and have solid tools at your disposal, it will not be particularly expensive to do.

From 50-500 to get going.

I got amadey and smoke and cobalt and mythic... defo not noob
just wondering on your choice of crypting... it was two seperate questions.

I also wished you well in your sales.

Perplex - April 21, 2022, 10:27 pm

I also wished you well in your sales.

Was not trying to imply that you are new :) I was simply stating that this is not for new people :)
"if you are already in the malware game 50-500 is all you will need to start this" is very correct. I consider "already in the malware game" to mean that tools and crypt is already something the potential buyers are capeable of handling.

If one is not in the "malware game" then it will be alot more :)

My choice of crypt depends strongly on the situration i hope to use it in.
I generally recomend using private software, or atleast very limited ones for runtime critical tasks.
Or some very neat amsi bypass techniques to unpack the loader atleast.
For the post exploitation, a good scantime crypt injected into a running process works wonders as always.

Thank you. Clearly i missed that one. Im very tired and should be sleeping already :D

Nite!

xPlutus - April 21, 2022, 10:42 pm

Bookmarking to find this thread back later.

Mind sending me your TG/Discord/whatever over pm/convo? Have a few questions.

Gotta sleep now as well.

BigStuart - April 22, 2022, 3:52 am

This is very interesting, keep up your good work.

Perplex - April 22, 2022, 5:53 am

just wanna come in here to say that you could easily hold 50k+ clients in software made in C#. If whatever software you're using is coded like shit, that's on the developer.

Perplex - April 26, 2022, 1:44 pm

(Apr 26, 2022 08:24 AM)Angela White Wrote: [\[CITE\]](#) just wanna come in here to say that you could easily hold 50k+ clients in software made in C#. If whatever software you're using is coded like shit, that's on the developer.

Yea

you can do anything here in life, also eat a bit of arsenic without getting very sick.

Shold you tho? THat is the question

For what i teach, you should not use c# unless you want a sub-par experience with it. Thats just how it is when you tryna aim for the masses.
native is the way

And this is even disregarding the ressource effectiveness of native over c# c2c....

tv911 - April 26, 2022, 3:16 pm

Thank you.

Availble for sales today

Perplex - April 28, 2022, 8:01 am

First sale completed.

Customer seems happy with his purchase (no reason not to be tbh)

Awaiting his vouch/review of method as he gets to testing it

Perplex - May 1, 2022, 10:05 am

Still awaiting review from first buyer. He has said nothing but positive words so far in private, but still needs to fully execute it afaik. I'm sure he will be happy tho.

Get in before it's gone.

Perplex - May 3, 2022, 2:20 am

available. Get in on the best botnet growing method I have seen for ages

Perplex - May 5, 2022, 1:45 am

Available and works.

for an additional fee, I can help out with crypt and delivery method too.

IGotAmnesia - May 9, 2022, 1:31 pm

Can you dm me your tg or discord? Thanks.

Interested in that vouch from the first buyer too tho.

IGotAmnesia - May 11, 2022, 12:36 pm

Just bought this. Seller is super friendly and really out there to help you. Will update how it goes.

Perplex - May 12, 2022, 7:09 am

(May 11, 2022 12:36 PM)IGotAmnesia Wrote: [\[CITE\]](#) Just bought this. Seller is super friendly and really out there to help you. Will update how it goes.

Yep

Method delivered, IGotAmnesia is fairly new to botnet tho, so he is also taking my normal mentoring. Thus might be a few days before vouch is shown.

3 copies left.

May increase price to 1500 for last 3

modelves - May 13, 2022, 8:17 am

hello I was wondering how much does it cost to get bots with this method and what can I expect

Perplex - May 13, 2022, 9:54 am

(May 13, 2022 08:17 AM)modelves Wrote: [\[CITE\]](#) hello I was wondering how much does it cost to get bots with this method and what can I expect

Depends on the quality and geo target. Multiple options will be presented.

Geo targeted bots are 0.2\$

Smoky - May 17, 2022, 2:00 pm

I come to make my return on the method of Perplex

First of all I have to say that he is a very nice person and he explains things quite simply if you need it.

He is often online and he answers very quickly which is also an advantage to deal with him.
The method itself, it goes to the essential and each important step is detailed extremely well so that everything is as simple to understand as possible.

The figures announced to start with are also quite accurate and everything that touches the tools you will need can confirm it.

The method is quite quick to set up if you already have the necessary tools and there is no need for great web or it skills to do it easily.

I insist on the fact that the tools are extremely important and it's better to lose a few days like me if you think you need to get some of them back

All the information given in this method will make you get as OP says geo-targeted and quality installations.

I knew and I see now the huge potential of this method and the gains can be as consequent if the work is well done and maintained

And if you have any question, Perplex will help you and accompany you if you need it

I will add some more info in a few days.

If you are looking to get into this game for any reason, I can only recommend this guy and his method

Thanks again Perplex ??

Perplex - May 18, 2022, 12:12 am

Appreciate the vouch.

Glad you liked your purchase. Im sure you will make good use of it.

IGotAmnesia - May 18, 2022, 10:06 am

I can not recommend this enough. Sellers is truly amazing in helping me out, he's online a lot and get's back to my (many) questions and requests within the hour. So far this has been the best investment I have made in a long time.

I bought both mentorships from sellers and he has just been incredible in helping me setting everything up. Like he mentioned, I am completely new to botnets and all that it surrounds, and I wanted to set everything up properly. I'm currently still in the process of setting everything up, but that is 90% on me and 10% on the sellers of some tools I needed, and 0% OP's fault. I personally think you should really set this up properly, which simply takes time. But if you've got your opsec down already you could pretty much set this up within a day or two.

Seller also has a vast knowledge of the space and I really feel I'm going from zero to hundred within days of him helping me out.

In general it is also just super fun and interesting to do the work.

It's also crazy how many angles you can take on this to monetize it. There are just so many and I'm learning every day.

Really appreciate your help OP!

Perplex - May 19, 2022, 5:05 am

My creativity regarding how i could monetize the botnet is actually limited to botshop cause you gave the idea, or maybe just some bullshit mining stuff.

Are you able to recommend great tools, and how we can monetize it if we buy ?

I have a 5k \$ budget and was looking for a side income with like 1h work / day or maybe 2h.

If you think a newbie like me & without alot of time daily can make it with your method let me know, and send me your TG , Signal or even discord via PM (i can't answer pm cause i'm a newbie on HF)

Thanks and sorry for my broken english. I'm a baguette

I have sent you a message.

I can certainly help you get your grounds, but this method alone requires you to be rolling already. If you want to start from scratch, my "normal" mentoring is what you need. I recommend tools, techniques, crypts, sales funnels, opsec, hosting - you name it

I sell the 2 bundled together for 1600, 150 off for pack deal. However starting with the mentoring, and then buying this later on can also be a way to go.

I have had one buy both before at once, and start from scratch. I can tell you its gonna be a pretty steep learning curve, if you have to fully comprehend how to manage and use the botnet safely and succesfully, and also taking this one on top. It will kickstart your entry to this world immensely tho.

Its not impossible, it will give you the skills to quickly get deep into the industry, and save you alot of time and badly spend money, but be ready for putting some time into it, to learn, and then slowly you will work out ways to manage it with less and less of your time.

Its entirely possible to manage it with less then 2 hours a day, once you are into the rhythm and understand what you are doing, but if you only have 1-2 hour a day to learn aswell, it might take some time to get there :)

Lets chat further, see what your aspirations are, and we can then see how best to progress.

1 copy reserved untill monday

1 copy left for sale, then its done

Perplex - June 14, 2022, 6:09 pm
reserved copy is sold

1 copy left. now or never

Perplex - June 18, 2022, 8:51 pm
1 copy left.
method works as good as it have since day 1.
Dont miss out on the last chance to get into a real lucrative game.

Perplex - June 25, 2022, 5:24 am
Available in the next few days to finalize the last available sale.

Get the bots flowing in no time, dont snooze and lose

Perplex - June 28, 2022, 11:24 am
Been offline a few days, summer is calling. Sorry if i left you without answer, ill catch up with everyone today and tommorow.

1 copy available. Will be on next few days without distractions, so now is a perfect time to get it, ill be here to help you set it all up

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley

Online to fulfill order, answered queries.

1 copy left

EricDaviesPPI - July 4, 2022, 5:21 am

It looks good, but why is the number limited?

Will the market become saturated as more and more people know about this method?

Sales are limited because i don't want to sell more copies of this. I plan to keep using it as well, for my own needs.

There can be saturation if tons of people do it, but it's not a huge concern, certainly not with 5 sales.

It's working as well as always.

Perplex - July 5, 2022, 8:51 am

Available to complete deals today as well

Setup will be quick and fast for ya, if you are already rolling.

Stop using botshops with resold shit, and start doing it properly.

Perplex - July 6, 2022, 7:19 pm

Yep, still 1 copy, but you already knew that. Ping me for details if you want serious business

p3reflect - December 26, 2022, 5:41 pm

I bought this back in the day, i know this doesn't count cause we have no contract. But i would like to clarify, this is very decent mentoring about how to get dozens of installs that aren't fucking sucked by everyone else
