Thread: [\[SCAM BY DISCORD BY PREMIUM SELLER\]](#)

ShuQi - April 21, 2022, 3:29 am

Hello.

Hi.

I know I shouldn't do a deal on discord.
However, the user was from the premium sellers tab.
@[HQCheckers]

I buy this

I know I won't get my money back.

I hope that no one else will be cheated by him.
This person is dishonest.

To be sure, as you can see on the screenshot, I even asked if all the shipping details are ok - he confirmed that they are ok.
And now he blames me, that it was me who entered something wrong. [warn]

Will be posting a video proof of this later, maybe eth is being slow and its a misunderstanding but I've not got the funds and the guy wants to be childish, will reply later when I'm home with proof

ShuQi - April 21, 2022, 3:31 am

You must be mocking, the funds are going almost 24 hours.

The only proof is the proof of shipment (transfer)

I hope you will be banned or at least someone who wants to buy will not be banned by cheated by you.

Eth isn't slow. You just have a habit of scamming non upgraded members who don't use contracts so they can't leave negative on your profile.

your older sales threads have at least one person saying you scammed them and another thread with 5 people saying you scammed.

your signature conveniently has a broken thread link because you want noobs to go directly to your discord and not make a contract on the official thread.

You're selective scamming trash.

SYM.

Me and the guy are sorting it together, proof has been given that I haven't actually received the funds, so talk your bubbles elsewhere buddy :))

@Shu let's also open a contract for this deal [warn]

I feel bad your kid has a bum father tbh.

You scam regular members. It's ok. You're just one of many losers in the marketplace.

and fix your signature so new members wont keep getting fooled and going straight to your discord?

Scammed me for 150\$

DO NOT TRADE WITH THIS GUY.

I once bought the live snap app and everything went smooth so I trusted him.

I don't get how this guy is still not banned.

(Apr 7, 2021 04:18 PM)hackdanny Wrote: [\[CITE\]](#) Made purchase on 03/22/2021. Went first, paid full

amount in BTC and was asked to wait 24h.

Atro contacted me 10 days later (03/30/2021) to tell me he couldn't deliver the software due to an IRL issue. Seeing as I had already paid and there was radio silence for 10 days, I was just happy to have contact at this point. The paypal account he was using to purchase UDIDs was in the negative so unless I was willing to buy my own UDID (\$10 extra on top of what I've already paid), I wasn't getting my software anytime soon.

I have proper documentation (BTC confirmation and full logs) if I need to verify. Having to pay first and being promised a product within 24h and waiting 10+ days to just be asked for more money feels like shit.

Ik shit happens and we can't control what happens IRL but as of the day of this post (04/07/2021), 17 days after I've paid and 7 days after he messaged me, I still don't have it. I'll keep this post updated.

I'm not sure if he's busy or just taking a break but I have made a purchase and haven't been able to make any solid contact with him just sporadic discord messages, I've emailed the support. Does anyone know of any other contact details for them? thanks

Regardless, dealing without contracts is not permitted. Goodbye.
