Method 1: Selling phone verified accounts:

Register on 5sim.net

Choose a website, Ex: facebook

Create facebook accounts using different ips, verify them with the phone numbers from 5sim and let them warm up

Create a sales thread design using canva.com (easiest) and sell those phone verified accounts!

Method 2 (easier): Offer SMS verification service

A lot of people are lazy or don't know about 5sim.net

You will be reselling phone verification service from the website to them on discord / telegram

You can make up to \$1 for a verification that costs max \$0.2 on the website

Good luck!
