Thread: [Click the Button on this website using Selenium and Python](#)

The Pulp Fiction - April 23, 2022, 4:28 pm

I want to click on the button "Hinzufügen"/"Add to" in this [URL](#) using Selenium and python. I tried it with different methods and it's showing the Exception "`selenium.common.exceptions.ElementNotInteractableException`". What do you all suggest to make it work?

PS: I have made sure that the element is visible and is shown in the window.

```
Code cookie_accept_modal = WebDriverWait(driver, 10).until(
    EC.presence_of_element_located((By.ID, "ensCloseBanner")))
).click()
add_to_cart_button = WebDriverWait(driver, 10).until(
    EC.element_to_be_clickable((By.CSS_SELECTOR, "div[data-testid='desktop'] > div > form >
fieldset > div > div:nth-child(2) > button")))
).click()They have a button for the mobile and one for the desktop version, the mobile button
appears first in the dom and is not reachable, i think you were clicking that one.
```

Thanks bruhh, my chrome is showing me the mobile version instead of the desktop one. I didn't
even notice it, u cool ??

Closing this thread, Have a nice day :).
