Thread: [\\$AXPR \(Best low cap gem around?\)](#)

cryptobrah1 - April 24, 2022, 1:42 pm

this coin (\$AXPR) looks pretty undervalued IMO . what u guys think?

<https://axpire.medium.com/q1-2022-progress-report-axpire-e9fe93a4ddec>

\$3m marketcap, its listed in Kucoin.

down -90% from ICO so shouldn't have much selling pressure anytime soon either..

- big product release soon & marketing will follow . team also said exchange listings coming after product launch

Everyone thinks its dead.. thats why price is so low

buy when there is blood in the streets

I have a strong belief this is nothing more than shilling another token, ngl unless you're founding a token/ICO/NFT its hardly ever worth it in my experience, due to the unpredictability. Not to mention there are tens of new tokens launching every week.

Plus OP is bypassing the link filter to begin with.
