I usually do \$40 deposits ...I find I can still get up to 2-300 even if I depo as low as 35-40.

In this case if you end up getting some bad luck your loss isn't much.

Here is what your deposits should look like:

What's lifetime membership? Does that mean the other packages are a limited time period that you need to subscribe to?

Also, bustabit was always a busta bust with different methods on this forum. If you can get a vouch, that would help things out.

I've set these methods up and the way I play is making minimal deposits and cashing out much higher amounts. This way the investment you chose to deposit if lost is not the end of the world.

My average deposit is \$40

At least 75% win 25% loss , I can pretty much double my money 90% of the time. The only thing that holds me back and my hardest is to be disciplined when I lose a small amount,

The champion holds out and doesn't bet high with emotion, if I never increased my bet amount it would be very hard to lose my entire deposit.

Depends , sometimes I play longer if I'm doing good . I've gotten up to over 25k-30k bits from \$40 a couple of time. But on general gameplay to profit sometimes I only 1.5x my deposit and withdrawl. To me the money is safe when it comes out, but I also want to make it worth my time.

correct, ideally you never lose a deposit, but yes if you lose one 40 deposit it is not as painful when you regularly withdrawal 100 or more.

You make no sense giving me -5. So you can't gamble smartly? skilled gamblers assess the risk of

each round based on the mathematical properties of probability, odds of winning, expected value, volatility index, length of play, and size of bet. These factors paint a numerical picture of risk and tell the player whether a bet is worth pursuing.

OP is a good guy, just needs improvements. I won't say I was scammed but I'm simply not impressed.

I ran his script passively while I was watching it, it would lose some bets then bet higher to make up for the losses.

Message me back when you can string a sentence together properly.

I followed his method, you can clearly see that when I followed it with patience i made a decent profit, and when I got greedy I lost it all. That just proves that his method works and making stupid bets going for x50 etc is just stupid. I realized I don't have the self control to gamble with such a website so I didn't bother reloading my account. Taking screenshots just to shit on a guys sales thread makes you a dick, I wouldn't of deleted my account or lied about it if asked. i guess I could of been more transparent and said "oh shit, I got greedy, ignored his method and blew 5k bits but like I said I was pretty salty about losing my stack. I still stand by the fact that if you follow the method with

a strict discipline you can make money from it.

take another look at the graph, you can clearly see the way my profit moves up following his method 1 and then the way it falls when abandoning the method.

I bought the ebook and script and would not recommend it at all.

The ebook is basically double your bits if you lose... yeah well... everybody knows how that works out at the end.

And the scripts they just don't work or send me like 6 scripts tried them all but they just have bad tactics... run them through bustabit simulator after I lost my bits but almost all the script turn out in red or around the same bits you started with.

definitely not worth buying!

The ebook is basically double your bits if you lose... yeah well... everybody knows how that works out at the end.

And the scripts they just don't work or send me like 6 scripts tried them all but they just have bad tactics... run them through bustabit simulator after I lost my bits but almost all the script turn out in red or around the same bits you started with.

definitely not worth buying!

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Is OP really commenting on his own thread saying "it's a hell of a deal, thanks" ?

Anyone who is going to bustabit for profits is gonna be sorely disappointed.
