Thread: [Elon Musk now own Twitter: What about dogecoin ?](#)

SurHomme - April 25, 2022, 12:31 pm

It confirmed: Twitter just accepted Elon Musk offer. DogeCoin is up 23% for the day. I am excited to see if Elon will integrate Dogecoin on the platforms.

I think this is extremely bullish for Dogecoin, especially if he integrates Dogecoin into twitter

What is your thought ?

So he already bought it?

It explains this

Twitter is his only product where Doge is a viable form of payment. Twitter also introduces an ecosystem ripe for tipping.

I don't see how he doesn't integrate Doge, however, I don't see him ONLY integrating Doge. Maybe he introduces Doge first then rolls out others.

Wow, that's insane. I definitely see him integrating Doge into Twitter somehow. It'll be pretty cool to see what happens. I'm actually considering picking up some Doge now.

Never get against Elon.

Buy doge, even if it's just a small amount.

shootoutxd - April 25, 2022, 8:47 pm

not bad i personally dont think this means much

SurHomme - April 26, 2022, 5:50 am

Look what I found, I doubt he will do it but that would be funny as hell ahah

The two things have nothing to do with each other, sure DOGE is up as a result of this because

DOGE fanboys still think the two are related. I doubt Elon holds any DOGE anymore, just like he has nothing to do with FLOKI despite people saying he endorses it.

It really doesn't... He's admitted his role in deliberately overpricing crypto's before, referring to normal people as 'NPC's' to him.

Why don't you think he will do it again. He has the full power to do so now :)

Remember the SpaceX Doge-1 mission. (Didn't happened yet tho). So could maybe he integrate Dogecoin into twitter ? Maybe, nothing is impossible, he's crazy enough to do it for sure.

True, he never said that he have FLOKI. Tho, he said that he's holding ETH, BTC and DOGE

SUI-3183372 - April 26, 2022, 8:56 am

Btw he doesn't own it yet, nor will he any time soon. This deal will still take months to play out and at any step of the way could simply fail. For all we know this is a publicity play by the Twitter board with the full intention of this deal failing later.

If he changes the logo to doge that would be crazy lol

why would he do that? although the CT community is large why would he destroy the credibility of the masses of people who don't use twitter for crypto or have no interest in it. However you are right, if he did do that it would indeed be crazy.

Maskin - April 26, 2022, 4:45 pm

I just bought a bag of doge. Only because of fear of missing out.

Smart, if BTC goes up so will everything else and if Elon does something with DOGE on twitter you're rich.
