Thread: [Coder - JS/MYSQL/PHP Task](#)

UNKNOWN1 - April 26, 2022, 8:07 am

I got a small website which I want to make some basic features.

Some of these tasks are:

Add a Transfer balance function between accounts

Add a admin page where it prints a specific database table results with a specific data

Add a button to delete some entry in the database

Tasks are pretty basic on my honest opinion, but time is money and I willing to pay you for your time.

Paying with Paypal/BTC, PM me with your discord/telegram if you can handle this

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Still need some JS/PHP dev to fix a small issue (should not take really too long, I basically migrated a website and is not working now)

Willing to pay up to \$15 BTC/PP/LTC for the fix (site is working fine)
