Thread: [Reddit upvotes/downvotes and comments - awesome for crypto, nfts, any advertising](#)

Perplex - April 26, 2022, 9:01 am

Guaranteed non dropping reddit upvotes in bulk quality available.

Perfect for your crypto rankings, nfts, eworing, degen stock bets, advertising, spreading, or whatever else your heart desires - you post it, ill upvote it :)

All our comments and votes are from real accounts, no bottled shit accounts with no history. Minimum karma target available for comments, so we can comment on all posts, in all subreddits.

Comment or post upvotes

500 upvotes/downvotes (split between 1-5 target posts) = 50\$

2000 upvotes/downvotes (split between 1-10 target posts) = 150\$

5000 upvotes/downvotes (split between 1-20 target posts) = 325\$

10000 upvotes/downvotes (split between 1-30 target posts) = 600\$

More? Not a problem! Contact us for a bulk deal? Returning customer? We will make you a good deal aswell.

Upvotes will be dripfeed, speed can be set for each order, depending on order size and group activity, to make it look as natural as possible

Mass comments are also available, however i do not currently provide a writing service, so you will need to supply the list. That also ensures you get exactly what you want. Custom karma is required for each subreddit, so this pricing is on case to case basis. No group is too big for us tho.

Very slow drip feed available for comments. We can do a few a day, or thousands.

sophisticated custom developed tools are used to ensure that no comment ever is posted twice, even accross multiple posts with similiar content, if you wish it not to be.

We can accomodate any order, contact me if you need some big bulk deals, or are a reseller. We can maybe work something favorable out.

More fun stuff comming, stay tuned. [contract=tid]Start Contract[/contract]

We dont sell 50 at a time, sorry.

if you have multiple posts, we can split orders to multiple posts, as descriped in post

If you mean that you do not need 500/5, we can do 500/10 for you too, leaving you with 10 posts that have 50 upvotes each.

Perplex - May 1, 2022, 5:04 am

Downvotes capabilities is same as upvote :)

Both price and availability

Perplex - May 2, 2022, 8:40 am

Available.

Soon our automated order and delivery panel will launch. At first you will need to purchase a big credit pack to get access, but as we progress, we will likely open our service up for integration to smm panels all over the web.

This will mean that you will have full control of the distribution and timing of our services. It will be, by far, the most sophisticated off its kind available. We only do things we can better than the rest.

From my research, we are already those with biggest capacity of non drop non shadow banned reddit accounts anywhere, and we just begun.

Come play with us if you want to make some stacks.

More rare and sought after Social media services will be added continuously.

Perplex - May 3, 2022, 8:42 am
Available.

Try my service to gain real traffic for any niche, you wont be dissapointed

Perplex - May 4, 2022, 4:39 pm

No job is to small, you wont find anyone with our reddit capacities around. No where near.

Smm panels suck, they got so small pools of accounts. We got all we need, and can do 10-20x+ of other sellers

Castro - May 6, 2022, 9:12 am

Looks like a good service and pricing is bang on.

GLWS.

Thank you.

We certainly will deliver more then anyone else working reddit rn. Atleast openly.

Glad you like the price :)

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

IMO for this type of business you need a panel. (Note I am not self advertising -- my panel is down a long long time ago).

A panel which allows:

Amount -> Speed of delivery -> Instant order starting. Once you have this just keep it live and the word will spread fast.

Feel free to PM :)

I certainly agree. I have one under development, but summer, and other projects and shit.

cant do it all haha. Actually got it a good way completed, still needs quite a bit to go live, but all custom skeleton is ready.

I need more hours in the day
