Thread: [reddit bots for mass pm, mass poster, upvote posts, and downvote comments](#)

Ruhenlos - April 29, 2022, 8:39 pm

hello,

I need all-in-one bot or separate bots for reddit services which offers the following features:

mass pm:

- 1) pm all commenters of selected posts without duplicating my pm to the same user who made multiple replies in the same post or the other selected posts.
- 2) gives enough delay between each message sent to avoid flooding/spamming warning by reddit.
- 3) supports "new line" feature so that my pm won't be sent as a paragraph like it was with the old theme of reddit.
- 4) if possible, it can pm all online users of selected subs.

mass poster:

- 1) creates posts in selected subs at the same time (without the 15 mins limitation, if possible) using 1 account or multiple ones and residential proxies.
- 2) supports reddit's "fancy pants editor" posting format.
- 3) if possible, it can bypass sub's spam filters to avoid getting my posts deleted or shadow-banned (showing with empty content).

upvote posts:

- 1) upvotes my posts organically to let them show in "hot" tab/rankings without getting my accounts banned as I'll be using aged accounts with post history & good amount of karma.
- 2) upvotes multiple posts at the same time.

downvote comments:

downvotes selected comments in my posts organically.

if anyone have those bots ready for sale or can code them for me in a deadline of 2 days, message me on telegram @drizzlion

btw, we will use a contract and mm for our deal, so don't waste your time trying to scam me!
[contract=tid]Start Contract[/contract]

<https://hackforums.net/showthread.php?tid=6202967>

you should get in touch with me. Can provide all the services you request, and we are coding a framework to automate delivery of all services, that will launch within too long.

I'm not interested in paying for services, I need to buy the mentioned bots for my own usage.

What are your budget?

I have the bot, except a bit of functionality needs to be added for your specifications, but its not alot. Not sure im willing to let what i have go tho. If price is right i may.

check your convos.

Stanley - May 3, 2022, 8:25 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
