Thread: [Looking for quality file binders, rats, and crypters.](#)

Dasher - April 30, 2022, 11:44 pm

Hello everyone,

I'm currently looking for quality file binders and RAT's, and crypters if the aforementioned tools aren't FUD (obviously).

I'm not really looking for any hvNC, crazy private spying features or exploits. It just needs to have the basic RAT features. Also, any offshore hosting providers would be cool as well, so I can set it up without the hosting provider suspending my subscription and/or my account.

If you haven't been able to tell, I'm quite new to this. I was checking out #, is it worth it?

Any recommendations would be greatly appreciated. My budget margin is pretty open. Tools with lifetime subscription options would be great as well (as opposed to month-to-month subs).

Thanks in advance.

You can use my rat if you want ? : [GitHub](#)

Also Quasar, Async and Revenge are quite good but missing recovery passwords.

I would say, go with eagle rat posted by above user. Its the most Updated rat as of now. Also for crypters you can look into my crypting service. Link in my signature.
