Thread: [fake photo on snapchat](#)

Low_Level - May 1, 2022, 10:47 pm

How can I send a photo from the gallery and have it come out from the camera on snapchat? I've tried lots of ways and I can't get it, please if anyone has any ideas I'd be grateful

Buy a 3rd party modded Snap app.

Hello, I have done everything in the video and when I upload the photo it says...error, something went wrong.... I have looked at the github file and it says that it could be three things, the code (which I am sure I have put correctly , it can also be the username that I have also put it correctly and the last thing it says is that maybe android was not activated, what does this mean and how can I activate it?

I just tried it and when I upload for example a story it says 20 min ago from ovf editor not from the camera

By the way, does anyone know why snapchat accounts block me so much? I already have two and only doing tests
