skipthegames has a very strong security and they can block MAC IP address, so make sure to have a good verification and do not try to bypass or you'll get burned

Mac is layer 2 so not sure about that. Also, it is very easy to spoof. What they ask for in the verification? ID, selfie...? thank you bro.

I personally used megapersonals and skipthegames to post my ads to find clients, and then well, leave the rest of the transaction up to your imaginations. That's all there is to it, and judging by the username and unactiveness for almost 3 years now, she was hoping to do the same after losing her own profile.
