Thread: [Massive Domain List for Sale](#)

Raptor. - May 5, 2022, 1:55 am

Looking to sell a bunch of really solid domains. Listings are up on Sedo for most of them. Most are with Godaddy, some with Namecheap, and some with NameBright.

All websites are still for sale? Prices?

Would also like to inquire. In addition, Are you selling them individually or as a package and what is the price you're looking for, for each domain and possibly as a package deal?

Do they come with domain transfer codes to transfer them away to a registrar of choice?

Easier to just push it through to an account of yours at their current registrar and you can transfer them out.

Shoot me an offer on anything you like, the only ones I'd probably not want to sell individually would be the WHORED/WRESTLED ones as it's just better to sell them as a bundle in all honesty.
