As a huge Casio fan and almost addicted to the black color I couldn't resist and ordered another one ! GA-2200BB-1A is my next watch ! What you say?
Show me something you own !

I enjoy watches, I wear my apple 'watch' almost every day. When I go out I have a nicer watch. Wish I had a picture to show you.

Smart watches are useless! My opinion, don't get me wrong! Glad you have something else to wear for occasions!

I also wear my Apple Watch every day, because its an easy wear. I love luxurious watches and I get it in exchange for rough diamonds stones.

Can we see a picture of what you've ordered?

I've always wanted an oyster perpetual Rolex.

I actually own the same G Shock for work. Very nice watch and good choice.

Copy-paste that GA-2200BB-1A on google ! It would be easier ! Not something expensive , but a good one indeed!

Remind me in a week or so how much you like it! I wear and black and gold G Shock now because it was a gift from an old boss but damn is it hard for me to choose my favorite. I wear them all!

Idk about that one.

I wear a garmin. Need to charge it once a month, tracks everything I need including texts. Also gives me 8 digit grids and has compass, elevation, sunrise, and a shit ton more options.

I don't like smart watches either. Currently I am wearing Police watch and it is looking smart on all occasions.
