Thread: [\[Free Trial\] Lalicat Proxy Browser | Multiple Account Manager For Marketing](#)

borha - May 7, 2022, 2:21 am

Lalicat Antidetect Browser can help you manage your multiple accounts of eBay, Amazon, Twitter, Pinterest, Instagram easily without risk of account banned.

Lalicat Feature:

1. Manage Hundreds or Thousands of Browser Profiles;
2. Keep Separate Browser Profiles;
3. Member Management And Cooperation for multiple Accounts;
4. Automate Browser Actions with API.

Use cases: SEO, E-commerce, SMM, Affiliate Marketing, Ads Agency, Online Survey, Traffic Arbitrage, Ticketing Online and others.

Supported Proxy: Any Proxy is Supported.

Promotion in HF:

With code:HF7DAYS, you can get 7 days free trial.

borha - May 10, 2022, 11:07 pm

anyone want to get 7 days free trial, please let me know with code:HF7DAYS.

borha - May 11, 2022, 11:55 pm

1. Lalicat Features.

A. Multi Account anti Association Management.

It supports running multiple accounts at the same time, and sets a different login environment for each account through virtual browser fingerprint technology. Each browser profile can be configured with a separate IP. Cloud synchronization technology makes the browser cache data never lost.

B. Simulate browser fingerprint

By simulating varied fingerprint information from different computer or mobile device, the cookies and local storage of each browser profile will be completely isolated and different to prevent the accounts association or linked.

C. Configuration with independent IP for each profile.

Each browser profile can be set with a proxy IP, so that each account with each saved browser profile can not only maintain the stability of the login IP environment, but also match a stable time zone, language, longitude and latitude of the corresponding country based on the IP address.

D. Local API.

Lalicat browser supports the local rest API interface function, that can automatically create, run and close the browser, read and write account configuration information, configure proxy IP and other API functions, and support selenium and puppeteer automation framework.

E. Cross Regional Team Workflow.

Lalicat browser supports sub account management and authority allocation, can freely share and transfer profile to any other mother account or sub account, and keep the profile fingerprint data stable without logging in to the website account again across different computers or other devices.

Jolasveinn - May 12, 2022, 1:19 am

I was using GoLogin before, in my mind I want to try this

AnonoX - May 12, 2022, 10:52 pm

thanks for this, love this site

borha - May 15, 2022, 11:37 pm

Now some of our customers send us feedback that Lalicat is better than Gologin for creating and managing of multiple of google ads accounts.

Recently, Lalicat has updated WebRTC, which is better than Gologin.

And most of customers send us feedback that, Lalicat is better than Gologin in creating and managing of multiple accounts of Good ads.

Now I want to share you about Lalicat Use Cases:

1. E-Commerce:

<https://www.lalicat.com/e-commerce>

If we are running multiple e-commerce accounts, we also run the risk of platforms like eBay, Facebook, and Amazon banning our accounts. If accounts are detected as operated by the same user, they will be automatically flagged as suspicious and suspended, maybe caused by some detailed mismatch or parameters in browser fingerprint, including GEO location, IP, suspicious OS, or behavior. It is a big risk even lost for online E-commerce businesses.

So how do we stop it?

The best way is to install an antidelect browser like Lalicat that will provide us with hundreds of segregated virtual browser profiles in detected as native, genuine fingerprints instead of blocking platforms from reading the browser fingerprint. All that is to keep our multiple accounts safe and

unbanned.

2. Social Media Marketing:

<https://www.lalicat.com/social-media-marketing>

"My Accounts Banned, what should I do next?" anyone, like social media marketing on Facebook, Pinterest, and more, while running their multiple accounts, will often meet this issue. When you have spent much time setting up your business online uneasily, reasonably hope it will never happen to yours. However, the consequences are always disastrous.

That is why we want to make a further discussion about the big issue again on some perhaps reasons of accounts ban and what we can do next.

Why are our accounts banned continued?

Firstly, let's have a careful look at why the platforms like Facebook, Twitter, Pinterest ban our accounts. There is not a reliable and fast way to confirm a precise reason for individual different conditions. always it is that the account is detected as suspicious activity, commonly said from the platform page.

Till now on, the marketers who have undergone and are familiar with these similar cases will mostly care about what we should do next. Generally speaking, it can conclude as follow:

Inconsistent Activities.

If you are making consistent activities in the same browser profile or ads account, it will be caused to be flagged up. Take the same account, for example, imagine that, you login to the account through a VPN at one time with a GEO location, but login to it next time in an absolutely different GEO Location. Likely, you are working in a team, and login to an account in the USA, minutes later, your colleague run the account in India suddenly.

In these cases, the platforms see the activities through their tracking technology on the account and signs that you are conducting inconsistent activity- even if you actually have not done it under your experience.

Suspicious Account History Recorded.

There are some businesses and individuals who promote buying the used accounts, which they claimed that they have been set up for a long time and with a number of used profiles and history that makes them could be in usable fastly as a common account. This, however, is truly a big risk, as we have discussed before.

As the new user of these accounts, you will log in them with a new different GEO location, new IP, new behavior patterns - all these will make them seem inconsistent and suspicious, never as consistent as they are promised above.

All that clearly indicated that there is no way to keep the account history safe if they have been used for some consistent purposes.

Similar identities detected within multiple accounts.

Your accounts will be remarked after you login multiple accounts using the same browser profile, such as the same chrome, IE, or Firefox browser. If you also still try to hide or change the browser fingerprinting with inappropriate solution, the real fingerprinting still be detected through your public IP, GEO Location, your OS, Hardware, and more, in so many cases from SEO marketers, SNS Ads Specialist and others.

Blocking Fingerprinting.

Till now on, you may still possibly regard that, the easiest way to stop platform tracking is to block fingerprinting. It is not as easy as you thought before. It still is flagged up as inconsistent activities if you try to conceal the identity information.

What should we do after Facebook's account is banned?

As most of the person do, like e-commerce specialists, affiliate marketers, Social media agencies, SEOer, and more, we firstly want to appeal, when coming across the issue. However, the opportunities of getting them back become at a low rate of possibility.

Therefore, the best action we should take: From the start day on, we need to carry out a perfect protection solution that can absolutely help us out from inconsistent activities and accounts detecting.

Here, In Lalicat, our dedicated teams have invested and have been investing hundreds of days for getting a research and development a best powerful and perfect solution, we called "Natural Way", that means rather than the way try to block fingerprinting. Lalicat Antidetect Browser can provide you a virtual browser profiles, including multiple customized fingerprints, which allowed to be read as natural and real computers or devices, also like multiple virtual machines at one computer or place.

It is worth mentioning that the accurate isolation of each profile means that the cookies, browsing history, caches, and other information are never leaked between each one. It creates an absolutely isolated virtual browsing environment to avoid accounts being banned.

N0N4M3 - June 8, 2022, 9:00 am

im gonna try this and let everyone know.

borha - June 9, 2022, 6:23 am

OK. Please contact Lalicat service online by Skype and Telegram.

borha - June 15, 2022, 10:43 pm

manage multiple Twitter accounts using Lalicat virtual browser?

Twitter is one of the most popular social media networks in the world. People from all over the world use this network to share information. In addition, many individuals and organizations use Twitter for marketing. These individuals and organizations often face a big problem - they need multiple Twitter accounts, but you may know that Twitter does not allow access from the same IP to create multiple

accounts.

Multiple Twitter Accounts

Why your Twitter account may be suspended:

Violating community guidelines:

Some of the most common violations that come under this are account impersonations, abusive and offensive words, and sending threats to other accounts. Also, suppose you are posting sensitive data in the form of graphic photos, text, or videos that are not for the public to view, such as adult content and violence. In that case, your account may be suspended, even permanently.

Spamming:

Most of the Twitter accounts that get suspended are those that spam. These are primarily fake accounts that hold a security risk for the platform and its users. Since spamming is against the rule of Twitter, these types of accounts will get suspended immediately.

Unfortunately, at times, some people's accounts may get suspended by mistake. However, there are chances that Twitter's algorithm may catch slight irregularities in a real person's account and deem it as spam or a fake account, although it is not. If this is the case, the person can appeal, and twitter's team will take care of all the investigation.

borha - June 17, 2022, 1:48 am

create and manage multiple TikTok accounts:

TikTok is an app for making and sharing short videos. On TikTok, short-form videos are exciting, spontaneous, and genuine. Whether you're a sports fanatic, a pet enthusiast, or just looking for a laugh, there's something for everyone on TikTok. All you have to do is watch, engage with what you like, and skip what you don't, and you'll find an endless stream of short videos that feel personalized just for you. So some people want to advertise their products on TikTok and need multiple accounts for marketing. But the platform doesn't allow one person to register multiple accounts, so you need a tool to help you create and manage multiple accounts - Lalicat virtual browser.
