Probably because that someone is yourself... ya freak!

Lol

Lol

"Divers who accidentally step into the open lips of the monsters are not infrequently held with such force that they cannot release themselves and are drowned. The shells close with such force that they serve as gigantic traps."

"they can weigh more than 200 kilograms (440 lb), measure as much as 120 cm (47 in) across and have an average lifespan in the wild of over 100 years"

god damn

Eran - May 9, 2022, 4:31 am

Reminds me of those plants who trap flies and other insects. Scary shit

In my opinion, this video is proof of the existence of these organisms?

I just hope they are capable of bearing pearls as great as themselves???

Only because I care about my women enough to be able to give her the best of pearl necklaces ;)

metamorphosis - May 9, 2022, 4:53 pm

Someone injected that clam with steroids that's for sure
