I can give Kover a VC.

I need a second person with lots of rep and hold on the community that can vouch for the quality of my Bots.

I see that you don't have the rep I am looking for, would a discounted price to half work? Possibly up to 75%.

I could even do first 5 customers after that of the vouch copies will get 50% off on all purchases. I am looking to build the equity of my profile more, as I am not known for selling bots. But, only malware. A large demographic of sellers here resell from Botshops
