Thread: [Free FUD Crypt // AMSI Bypass // UAC Bypass // Obfuscation and Anti-debugging // .bat](#)

Wolf Tamer - May 11, 2022, 11:19 pm

I'm offering to crypt one .exe per person for free with a .bat output. This is using a tool coded entirely by me in Rust and is the culmination of months of windows vulnerability research and programming in my free time that mostly went towards cheat development for games.

Why am I offering this for free? Well I have an idea of what it takes to sell and maintain a reliable crypter and my knowledge is nowhere near that level. However I do accept donations and would greatly appreciate compensation that would go towards paying for college and ideally a (non-shitty) car in the near future, but if not then that's understandable.

The AMSI and UAC bypasses are semi-original and derived from publicly known methods off of github and a microsoft forums post from 2013, so I can't claim full credit there. The actual output is a .bat file as the bypasses are achieved through windows shell commands with some .NET calls. You can pack the .bat into an exe self extractor or inject as shellcode into a process I don't really care, that's up to you. There's also some anti-debugging/sandboxing techniques implemented with the hopes of making the crypt last longer.

I'm only offering this service to members who've donated to HF with exceptions if I'm in a good mood as to not be inundated with requests.

yes yes I know about machine learning but it was going to get uploaded eventually, might as well do it myself.

Fortune-teller - May 11, 2022, 11:25 pm

Hey I'm Hypnotist and I'm about to get my account back. Would I be eligible for this?

Discord: Administrator#1337

Please let me know!

fuck it, sent you a friend request. nice rep btw.

Investor - May 12, 2022, 12:01 am

Gotta love shitposting. Are batch files the only file extension these can be output to?

Shitposting is my passion.

It's literally a set of windows shell commands you can just call it and compile into .exe lol
Even IExpress works but that probably gets flagged by AVs.

Fortune-teller - May 12, 2022, 12:23 am

Vouch for this user the .bat works great and is bypassing :)

sufsa - May 12, 2022, 2:05 am

can i have a copy?? thanks

thanks for review can u share any proof and username of the sellerr

pbk1989 - May 15, 2022, 6:34 pm

I don't really have much to offer but would very much LOVE to have one of my .exe files crypter. All i have to offer is this amazing joke.

I went to the zoo the other day and after walking around the entire park and not seeing a single animal decided to leave. Frustrated, and walking to my car i spot a stray dog in the parking lot.

It was a Shih Tzu'.

Hi, am interested in that shit if you can crypt a file for me, meanwhile no btc at the moment.

justalemon - July 4, 2022, 10:39 pm

Hi there, I am interested, maybe I can learn something from you. I am up to sending you some BTC in exchange. PM me if intersted.

hey uh... idrk if your still doing this but im interested. I have the .exe, however it relies on other files. DM me with discord info if your still offering this.

Thanks,
Nebula
