Thread: [Get wifi in garage ?](#)

adam5959 - May 12, 2022, 8:06 am

I rented a garage, I'll be remaking it with firend to a nice space for us two to go game in and store our shoes (resell buisness).

One big problem I have is internet connection. The garage is far from my house so running a cable there or simply paying for extender wont do the trick.

Good thing is that the garage is in building under apartments on the first floor and it does have electricity.

Do you guys have any solution on how to get internet connection without having to talk to the people above us.

lol - May 12, 2022, 5:43 pm

Don't use Wi-Fi and Wi-Fi extender. Use ethernet.

This is what I use and it works f**king well. No lag whatsoever.

neat15 - May 12, 2022, 5:45 pm

Maybe buy a booster that goes in the outlet

adam5959 - May 15, 2022, 2:14 pm

But where do I get that wifi from, it's completely different building.

(May 12, 2022 06:39 PM)Dyne Wrote: [\[CITE\]](#) Use Ethernet into mesh wifi system.

I never use direct to home Wifi/router unless its on a personal laptop/device.

EDIT: or use an ALFA wifi router/packet injector, with YAK antennas. This will not only allow you to reach the garage, but anything within a reasonable radius.

I get approx .41 miles.

I don't think cracking neighbours password is a good idea they might just have slow wifi.

abiabdujabbar - May 15, 2022, 3:34 pm

Use ethernet it is a good idea

bk randy - May 15, 2022, 4:21 pm

I forgot what it's called but there is something you can get to run wifi from really far, just a small box.

Sky - May 16, 2022, 4:03 pm

[Darkwin](#) were you ever able to get WiFi in a garage?

Those things are legit!!! I use them myself!

OnlyFans_Profit - May 16, 2022, 5:37 pm

Just grab an Ethernet cord mate! They're super cheap and come in long distance chords as well if needed. Used to run one through my house to my room to get faster speeds playing video games.

source - May 16, 2022, 7:25 pm

If they are using cable and you have a coaxial cable in garage than you can use a MOCA adapter, pretty useful tbh.

https://www.amazon.ca/Actiontec-MoCA-Network-Adapter-Ethernet/dp/B088KV2YYL/ref=asc_df_B088KV2YYL/?tag=googleshopc0c-20&linkCode=df0&hvadid=459397416412&hvpos=&hvnetw=g&hvr_and=15466985219654044327&hvpone=&hvptwo=&hvgmt=&hvdev=c&hvdvcmdl=&hvlocint=&hvlocphy=1002269&hvtargid=pla-930731861950&psc=1

Yeah, I don't know the exact tech but you can get positional antennas that reach separate buildings, I remember talking to a guy who had installed one to reach a little booth where two security guards were stationed and needed wifi.

SoulHarvester - May 17, 2022, 8:11 am

I know what you're talking about. I think this is the same tech they use to bounce signals over to islands close to mainlands as well.

"The garage is far from my house so running a cable there or simply paying for extender wont do the trick."

Did you miss anything on the way to your comment?

SIM-5033784 - May 23, 2022, 5:13 pm

Get an LTE Router from your cell phone carrier.

Jake Johnson - May 23, 2022, 5:15 pm

With the garage being far from your house and you not exactly specifying an estimated range of how far away it is that makes it somewhat complicated on what to recommend to get wifi into the garage. Obviously, ethernet is ideal but running a cable is clearly out of the picture here. I don't know how much the powerline extenders would help you out either. Kind of a tricky situation to

figure out here with it not being close to your house.

aloevera 76 - May 23, 2022, 6:59 pm

A silence router or adapter possibly. Is their another way I'm not aware of.

adam5959 - May 25, 2022, 2:13 pm

okay but where do I connect it if I dont have acess to any network in the building

(May 23, 2022 05:15 PM)Jake Johnson Wrote: [\[CITE\]](#) With the garage being far from your house and you not exactly specifying an estimated range of how far away it is that makes it somewhat complicated on what to recommend to get wifi into the garage. Yeah I guess it is, I am planing to talking to the people in the building and finding some solution that way, kinda wanted to avoid it but it's the only way to get stable connection.

(May 16, 2022 05:37 PM)OnlyFans_Profit Wrote: [\[CITE\]](#) Just grab an Ethernet cord mate! They're super cheap and come in long distance chords as well if needed. Used to run one through my house to my room to get faster speeds playing video games.

well the buildings are aproximately 150m from eath other idk about you but running 150m cable from my house to the garage, ill pass on that.

Nullusia - May 25, 2022, 9:28 pm

Ethernet cable is what I would think of first

r3byte - May 26, 2022, 6:56 am

Extend your ethernet / dsl line into the garage and connect a new router.

SoulHarvester - May 26, 2022, 3:08 pm

Hey OP what are you considering so far? Honestly curious.

someclosure - May 27, 2022, 8:54 am

You're a legend if you can reach Wi-Fi in your garage or you're attic. Pog

adam5959 - May 28, 2022, 5:39 am

(May 26, 2022 03:08 PM)SoulHarvester Wrote: [\[CITE\]](#) Hey OP what are you considering so far? Honestly curious.

i'll se the people in apartment above the garage and the last resort is alpha wifi adapter.

SoulHarvester - May 28, 2022, 8:11 am

I get approx .41 miles.

Woah im gonna look into this now, making me want to up my radius lol.

EDIT: Red egg <3

darkobox - May 28, 2022, 10:40 am

Look on the Chinese site they sell very powerful external wifi cards or hack a wifi near your garage thanks to Kali but be very patient to decrypt the passwords

They are great, they give you an Ethernet connection without all the extra wire. However if the electrical is not grounded it will not be reliable. It sounds like this is the case here.

Thats true! Definitely not something I had considered as an end-user but hopefully OP sees this.
