### ULTIMATE SPREADING METHODS E-BOOK

In this e-book I present 45 methods to spread your RAT or MINER. The levels of difficulty vary from method to method, some are simple, others require knowledge in the sector to be carried out in the best way.

These methods have all been tested and have always brought great results over the years, some of them will take time and work, while others are faster and autopilot.

To be able to perform these diffusion methods in the best possible way it is necessary to have a crypter or simply the file to be spread FUD.

show your own spreading result with date so we make sure that you didn't just collect all known methods and put it in .pdf and try to sell it

i don't recommend anyone to buy before posting proofs

best of luck with sales

there is no pay for 45 methods, you can find it on google easily

the market ends up becoming garbage by people trying to sell methods they can't use, that's disgusting!
