[+] Pricing I am putting pricing at the top of the list as it is the strong point of this product. Compared to what's known as "The Cheapest" shops around currently, which i will not name, this product surpasses it by a mile. most shop's you'll find 1K world for roughly triple digits, usually around 100, but here he is cutting that price to 70. wow! in times like this who couldn't be happy with 30\$+ of savings? plain & simple, pricing is a 9.5/10

[+] The seller the seller was very friendly, and got straight to work. 3BGP is someone who will always give a little more then asked for; whether its answering questions, solving issues, or compensating for errors or problems, his customer service is very good, keeping it professional & classy. this is the only encounter/contract i have had with this seller, but it went great. nonetheless, for the seller, i give you a 8.5/10

[+] Quality for quality, there isn't anything out of the ordinary here. expect to see a majority of CPU bots with low - medium quality GPU bots. what i can say is reflect on the price - you are getting what you paid for, straight forward. what i can say though is as far as CPU's go - i did receive quite a good diversity in quality of CPU's that i haven't seen in other loads. overall, for quality, i give it a 7.5/10

overall my experience was quite satisfactory, and i don't have much to complain on. overall, I'm giving this product a 8.5/10

whats the difference between Installs and Loads as per your service?

Installs are shared, Loads are one hand only

Seems this forum has forgotten the concept of installs/updates/loads and sadly most advertise everything as installs

P.S. The red text at the top of my thread tells the difference.
