Thread: [I raise and hatch Hackman egg and someone always kills it?](#)

SteveTobbs - May 17, 2022, 12:46 pm

I raise and hatch Hackúman egg and someone always kills it?

How do I just keep them alive. LOL

So, I will always be attacked and killed?

There is a 24 hours protection from when hatched, only applies if you don't level it up to much, can't remember the limit.

After that make sure to hide it using invisible potions, you can do that till level 40.

After level 40, it's game on.

Alternatively if you're going for the award, just keep hatching and bullying low levels. I haven't really invested anything into it and it's getting me easy kills towards the award.

Get a couple of green or red eggs, hatch one, use the other to power up the hatched HUM, get a couple of kills in. Rinse and repeat.

Regardless what you do [DemonAsylum](#) is just gonna keep popping up with overpowered level 1's and insta-killing you when you lose invis.
