Thread: [ChessBotX cracked](#)

VerX27 - May 21, 2022, 12:43 pm

Hello, well, I was testing this chess bot on lichess and I only have the trial version, I am a beginner in the area of cracking programs and I was wondering if there was someone who could crack it or who could tell me how to do it and prevent the program from closing after finishing the trial version. Thank you very much.

The page to download the bot is: [https : // chess -bot . com /](https://chess-bot.com/)

I haven't used Windows for ages, but back in the days, there used to be a tool to freeze the datetime for trials programs.

VerX27 - May 24, 2022, 8:56 am

What's up, I tried freezing the program, however this method didn't work because no matter the date of the day, this program will always have a limit of 15 moves, so I would need to crack the program in another way to get more moves , or otherwise, unlimited moves

Even I need it. But I have other free option if u had like. But the problem is:

i)It works on stockfish11 but the dev will upgrade it. Although u could easily win against players it still can't beat chess max engine elo 3200.

ii)It doesn't have simulate human moves feature.

Its just a tampermonkey userscript. IF u want it then just reply
