Thread: [\[LIMITED 10 COPIES\] START AND GROW A 5 TO 6 FIGURE SEO AGENCY](#)

JuiceBoxCereal - May 24, 2022, 12:17 pm

Introduction

I'm going to walk you guys through the exact steps I did to grow an SEO agency that has been making me a consistent 5 figures per year, with a peak of \$80k per year.

The cool part about all of this is that you don't need to know much about SEO (search engine optimization) in order to earn money. All you need to know is the basics of ranking websites and outsource the work.

In this guide, I will attach a provider I used to use in the past before starting to do the SEO myself.

In SEO, what matters is sales. Your goal is to continue bringing in clients so that you can make more and more money.

I once made the mistake of making \$5,000 per month on 1 client and not continuously getting clients. I paid for that mistake dearly when they told me something I never expected, "We don't need SEO anymore. Thanks for helping us get all of these clients but now we're swamped and can't take on any more work."

Never did I even consider this ??? ...and just like that, I was back to earning \$0 per month.

I promised to never put myself in that situation again so I built up a bigger client list using the methods that I'm going to be describing in this course.

Who this will work for

I'm going to be totally up front with you, you're going to have to talk to people. You're not going to have to do cold calling, but you're going to need to be able to talk to people on the phone.

You can close 1k-5k deals on the phone with a much higher success rate than through text or email. I have had 2 clients agree to large monthly retainers over the phone, another one currently pending, and 2 big ones in person.

If you're not willing to commit to talking to people, then we have nothing to talk about.

You will get sales through some text conversations, but I'll tell ya, you're leaving so much money on the table so just team up with someone who can.

This course works for people looking to, both, start an SEO agency or to grow their current client base.

This will also work for people who want to get more web design work, social media management clients or ad management.

Course Breakdown

- 1) What is SEO
- 2) Basics of ranking websites and Google Maps listings
- 3) Outsourcing the SEO marketing
- 4) Getting clients (11 methods) + bonus methods for social media + web design
- 6) How to get a free office to look professional
- 7) How to sell and negotiate deals, including answering all of the objections you'll hear
- 8) Bonus updates whenever they are released as I always want to help out

Pricing

I'm reserving this for only 10 people at \$150.

The reason why I'm doing this is because I don't want this to get saturated.

The free office method is just something that I don't want shared.

Let's kick off the sales.

- Copy 1
- Copy 2
- Copy 3
- Copy 4
- Copy 5
- Copy 6
- Copy 7
- Copy 8
- Copy 9
- Copy 10

Additional Services

If you have any questions once you've read through the course, I'll be certainly happy to answer them.

If you would like a 6 month mentorship where I help guide you through all of your endeavors in this space, it'll be \$500 for 6 months.

I'll be there to answer all of your questions when you're in the deal making process. If you're emailing back and forth, I can offer you advice on how best to word your sales pitches and handle objections if you're still not sure.

FAQs

Why are you selling this course?

By selling 10 copies, I'm not really going to be increasing my competition. I've been doing the SEO agency gig for a while now and I get referrals constantly.

Lately, I've also been increasing my own empire with pay-per-lead methods in order to make more money than monthly retainers alone. With my SEO, I'm not worried at all about competition.

Do I have to cold call?

No, you don't have to cold call. I'll teach you 7 ways to get SEO clients so you can use whichever methods you're most comfortable with.

I'll also rank which ones have worked the best for me in order.

This may also spark your own imagination to find twists to my methods.

Are you giving out vouch copies?

I'll give out 1 vouch copy to someone who is not only reputable, but I want someone who is brutally honest and doesn't leave fluff reviews. I want someone who's at least somewhat in this industry.

Are you open to using a middle man?

Depending on the terms, I might be interested.

What are your payment methods?

I will be taking crypto at this time.

Do you offer any guarantees?

The best guarantee you're going to get is through taking action and persistence. I grew up to 80k in 2020 because I literally would not do anything else except take action. Then I took more action. And then I took more.

Do I have to do this full-time?

You don't have to. I didn't and I still continue to do other things. Right now, I'm doing a lot of pay-per-lead. That's only because this revenue stream is bringing in continuous funds that allows me to have free time to invest in other ventures as well.

The more time you put into it, the better the results you're likely going to see.

Man, do you have a bot that alerts you when something is posted? That was like a minute after I posted ?

DM me your experience so I can get a feel for how much of an in-depth review you can leave.

I've got two people that are going to be reviewing this service.

@LeadPal is looking to get into the SEO agency model and has knowledge of SEO.

Then we have @01001 who is a legend on this forum when it comes to SEO. He has a service on here himself and I was honored to have him reach out to me to review this.

I think both of these users will be able to offer very fair assessments of this 24 page document.

I have also added more methods to this guide than initially stated so the value is further improved.

It's 24 pages long right now so it's going to take some time for the two of them to read through it and offer their opinion.

The first copy has already been claimed. Just going to be putting together the contract now for the buyer. 9 more copies available at low prices.

01001 - May 29, 2022, 10:07 am

I want to thank [JuiceBoxCereal](#) for considering me as one of his reviewers. I have done SEO for more than a decade (on HF), and my feedback will be outright.

Summary: This guide is meant for people planning to start their SEO Agency or who want to expand their current horizons. The guide is straight, simple, and does not require any third-party tools/resources since it's all about how well you interact with the client and close the deal.

What's different: Unlike other guides or methods, the writer/seller has specified everything in detail while explaining the importance of each technique. One must work hard on minor aspects to see a significant change - from emailing the clients to standing up to their expectations and working on those expectations to meet the deadlines without affecting the quality.

Final remarks: I would suggest the seller add visuals and must explain everything with some live

examples. Although if you are going to purchase this guide, then expect resources. The seller has shared some imperative links to help you in this journey.

Lastly, this guide would be more suitable for people planning to put their step in the world of Search Engine Optimization (SEO).

LeadPal - May 30, 2022, 8:56 am

Thanks [JuiceBoxCereal](#) for letting me read this e-book, I am by no means an expert in SEO, I'm just interested in it :)

This guide/e-book is for people that want to get started with an SEO agency, there was a ton of material provided things I never thought about they are all very well explained, down to every detail, it also includes how to handle clients, this is one of the best e-books I ever read, and I read so many e-books by now.

This is not a become rich fast, but you must put in work, if you follow and dedicate yourself to information provided by juiceboxcereal your seo agency will have a very good head start.

I recommend adding in some more general info about SEO, so a beginner also could purchase this.

The price is a very good price, I think it's cheap compared to what you will learn.

Good luck with sales, if you are into SEO, buy this, ASAP.

You can either do it yourself or I provide you with a company I've used in the past.

Edit: or you can use any outsourcer you want. I have no affiliation with any provider. I just know which one worked for me and you want repeat clients so use someone who you've had results with.

Quite interesting all this, could you PM me with some more details? Thanks and GLWS.

jack0929 - July 14, 2022, 11:36 pm

this is too hard. too much hassle and too much work is involved.

Make this autopilot or business-in-a-box then people would be willing to buy.

Can you please elaborate? This is how to start a business. A real business. Not a scheme. A business is work.

How do you know what's in the course?

This course is for people who want to build something real that pays for rent or mortgage, utility bills, car payments, cell phones groceries and more.

New bump for the day. PM me to get started on your business.
