Thread: [Signature not displaying in threads/posts](#)

source - May 28, 2022, 7:22 pm

I have tried to update signature to all threads, even future threads/posts do not include the signature, am I missing something?

Could this be the problem?

You need more posts.

Unsure the amount. I'd have to check.

Edit: doesn't show it in [Help Docs](#) but I remember having this issue.

Maybe. Off the top of my head I thought it was 250.

I can't seem to find anything regarding it, I was under impression the "upgrade" would include it. Perhaps im wrong.

Yeah I already checked that after my first response.
Didn't see the answer you were looking for.
Would be nice to have little things like that added to the Profiles page of [Help Docs](#).

[Eagle 95](#) makes edits to the [Help Docs](#) if I recall correctly. Maybe we could get that small detail added.

I think you need to have 250 posts as far as i remember.

If your display group is a custom group, then you'll need 100 posts in order for the signature to show.
