Thread: [I can make your landing page for free !](#)

Verified Social - May 29, 2022, 6:40 am

Hello there

as im new here im trying to give away free things of little knowledge i had
today i'm offering free landing page or one-page website
its effective for sales if u sell something online
its great for bot collecting " malware "
its awesome for business exploring
most important is its free of charge
but since it take long time ill make it for just 5
all i need is your content and formating you need on it
and all u have to do is wating and confirm each block and its content
also you need to have your own domain " free or paid " idc and hosting space that will hold your
landing page files
i can do it for any business since i'm the styler !
i hope who ask for it really need it because it takes alot of time to format and put the content and
final touch before publish
so please dont waste my time if u not gonna use it or just playing around
i have 3 lvl of designs depend on your content and your business i'll be the one who choose which
lvl is good and required for your business
again " just 5 people who want it "
ill be waiting for your pms
cheers ?

Have send you a Pm regarding it.
Looking forward for your reply.

one or multiple pages website depend on your content
also i can make it HTML5 + CSS
or wordpress portfolio and build it with elementor
