yes, an older version was being sold on here by a reseller for me, he exited scammed so now i have rewrote the bot with new functions and have decided to sell it myself instead of using resellers

I received a vouch copy from Mr. WebBots and I've had the chance to trial the bot for a few hours or so. Still have the bot running.

My first initial impression: Looks clean and simple, and has all the options you need to properly spam the source. It has thread, delay, proxy, and captcha options. Configuring the bot is as easy and editing a couple text files (spin tax supported).

One thing to note is that you will need your own Anti-Captcha key. Luckily I had one already, so I got the bot rolling pretty fast.

There was a tiny hiccup when I first tried the bot where an xpath on the site was changed. Mr. Bots quickly updated the bot and had a stable version for me within 15 minutes. He has been super quick with his replies, even after running the bot for several hours. So A+ on technical support. Although, you shouldn't need it assuming you know how to copy/paste a captcha key and proxies.

The bot does exactly what it needs to do. I used it to spam a couple snapchats and saw adds coming in right away.

You have the option to make an entire chat script to make you look more real/less botty. You can

send message 1, then when user replies, you can send message 2, and so on.. a useful feature.

Honestly very happy with the bot. Nothing I can really say bad about it. Other than there is no option to authenticate proxies, but I brought this up to Mr. WebBots already and he said it's possible to add it if enough people request it. The only other thing I found annoying is the chat sounds. I like to listen to music on my headphones, and I could hear the chat pings even with the browser being headless. I know the website has an option to turn sounds off, so maybe in a future version it could swipe those options real quick, otherwise you can do it manually yourself if you use the non-headless option.

Not a bad bot at all. CA is adult traffic tho, so don't expect [BRAND NAME REMOVED] quality adds/conversions, but as far the bot goes.. it does exactly as promised and what it needs to do.

A+

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
