Thread: [Surprising luck for this egg lottery](#)

The Pact - May 30, 2022, 11:50 pm

I just thought these results were pretty funny. Have a look at this.

haha thats some damn lucky person there.... But still in the overall sense hegettign picked had a still much higher rate than any lottery or casino online.

5% chance of winning is still a high number. But considering the above scenario it is indeed funny :D

The Pact - June 15, 2022, 1:33 am

We have another very lucky winner here in this closed one.

Pretty good results??

More than once, I won up to 500 bytes for a red egg (and up to 5000 for a blue one!).

It all depends on the need for a specific egg.

The Pact - June 15, 2022, 2:31 am

Seems those days are gone. I never get stuff like that and seems 2021 was a lot better for me with ticket sales on eggs.

That's nothing :D

Once I put 1 entry in while Demon put 150. I still won. Probably a lot of cases like these if you take a look around :P

For me, this year is much better than the previous one when it comes to the lottery. Maybe because I did not pay much attention to the prices of eggs in other users' lotteries (which is very important because it allows you to find out what is the "market" demand for eggs. Thanks to this, you can easily see if people improve their creatures and thus more willingly give more bytes for tickets, or maybe they save them for later purchases. This also allows you to estimate the right price you should be charging for your egg).

Below are links to my blue egg lotteries, let them be a good example of how much you can earn from eggs at the right moment in which there is a high demand:

<https://hackforums.net/lottery.php?action=view&lotid=17489>

<https://hackforums.net/lottery.php?action=view&lotid=17414>

P.S. I just hit another blue one, wish me good luck???

Raymond Reddington - June 15, 2022, 11:17 pm

A 1 in 20 chance, that's still more common and possible than the Dicey award (1 in 10,000). Took me around 3k+ spins to get mine

Vibe - June 15, 2022, 11:17 pm

Lmao ouch congratulations to the one ticket winner though

Nullusia - June 16, 2022, 10:22 am

DemonAsylum has left the chat.

Winner blackrosex0x0

blackrosex0x0 (1), DeepWeb (9), DemonAsylum (10)

The number corresponds to amount of tickets, he won with 1 ticket while there was a total of 20 in the lottery; 1/20 chance.

Gave up on entering them because they get killed the second they are off cooldown, waiting until I get a blue egg to play with.

blackrose won a 1:20 odds lottery, even with Demon sniping 50%+ of the possibilities at the last second. Hence, luck.

Its just a 1 in 20 chance though, 1 in 100+ wins happen all the time (coincidentally betting on a 1% flip would be like +28x profit instant on Primedice during the OG days)

28x profit on a 1% chance? That's crazy house edge ?

vegetajgd - June 18, 2022, 9:05 am

I am trying this right now bidding like 1 ticket which doesn't cost much and seeing if i get one lol. Lets see how many tries it takes :D

please dont Discuss the OG pays of primedice. the kids should not know something so perfect once was heaven.

Ps when they started there was no DS protection on transactions

That's hard to believe, maybe they haven't been heavily abused as such which is why they haven't addressed it yet.

What I'm referring to isn't abusable to the extent that typical DS protection prevents; although there still is a few places.
