CREATE YOUR OWN 4G PROXY NETWORK AT HOME

Hello HF, today Im selling a product that you can buy yourself online from [here](#)

This is a small box that is linux based that allows you to connect dongles sold by said retailer (Proxidize) to have your very own proxy network. There are a few things you must know about this.

1. You will need to pay for data plans with any carrier of your choosing.
2. You will need to activate the SIMs before inputing them into the dongles
3. The box needs to be connected to the internet at all times.

There are several use cases for this. People that ive talked to that own a Proxidize product use them for account creation, sneaker botting, botting clothes, ticket scalping etc

I personally used them for [BRAND NAME REMOVED] Botting

There is also a software that you need in order to use the proxies and rotate the IPs. Sadly that is an added cost that youd have to pay for. You can view the costs [here](#)

I currently own the first version of their Proxidize Box with 10 Dongles. Their first box is essentially the same thing as the newer one just with some re branding on it.

I will be providing the following

1. Proxidize Box
2. 10 Proxidize Modems
3. My Proxidize account
4. Power Cables for the following
 - Proxy Box
 - USB Hub
 - 3 Ft Ethernet Cable
5. 10 Port USB Hub
6. A small list of carriers I used
7. Support with setting up the box

[Picture](#)

The other 5 dongles I have are in my desk.

Please let me know if you have any questions

PRICE: \$500

I will only be shipping within the states.

I also take BTC, Cashapp and Paypal [contract=tid]Start Contract[/contract]
